

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

- Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2015

OR

- Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number: 001-12935

DENBURY RESOURCES INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

**5320 Legacy Drive,
Plano, TX**

(Address of principal executive offices)

20-0467835

(I.R.S. Employer Identification No.)

75024

(Zip Code)

Registrant's telephone number, including area code:

(972) 673-2000

Not applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at October 31, 2015
Common Stock, \$.001 par value	351,162,058

Table of Contents

Denbury Resources Inc. *Notes to Unaudited Condensed Consolidated Financial Statements*

Note 1. Basis of Presentation

Organization and Nature of Operations

Denbury Resources Inc., a Delaware corporation, is an independent oil and natural gas company with operations focused in two key operating areas: the Gulf Coast and Rocky Mountain regions. Our goal is to increase the value of our properties through a combination of exploitation, drilling and proven engineering extraction practices, with the most significant emphasis relating to CO₂ enhanced oil recovery operations.

Interim Financial Statements

The accompanying unaudited condensed consolidated financial statements of Denbury Resources Inc. and its subsidiaries have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC") and do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. These financial statements and the notes thereto should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014 (the "Form 10-K"). Unless indicated otherwise or the context requires, the terms "we," "our," "us," "Company" or "Denbury," refer to Denbury Resources Inc. and its subsidiaries.

Accounting measurements at interim dates inherently involve greater reliance on estimates than at year end, and the results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the year. In management's opinion, the accompanying unaudited condensed consolidated financial statements include all adjustments of a normal recurring nature necessary for a fair statement of our consolidated financial position as of September 30, 2015, our consolidated results of operations for the three and nine months ended September 30, 2015 and 2014, and our consolidated cash flows for the nine months ended September 30, 2015 and 2014.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current year presentation. Such reclassifications had no impact on our reported net income, current assets, total assets, current liabilities, total liabilities or stockholders' equity.

Net Income (Loss) per Common Share

Basic net income (loss) per common share is computed by dividing the net income (loss) attributable to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is calculated in the same manner, but includes the impact of potentially dilutive securities. Potentially dilutive securities consist of stock options, stock appreciation rights ("SARs"), nonvested restricted stock and nonvested performance-based equity awards. For the three and nine months ended September 30, 2015 and 2014, there were no adjustments to net income (loss) for purposes of calculating basic and diluted net income (loss) per common share.

The following is a reconciliation of the weighted average shares used in the basic and diluted net income (loss) per common share calculations for the periods indicated:

<i>In thousands</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Basic weighted average common shares outstanding	350,052	348,454	349,787	348,993
Potentially dilutive securities				
Restricted stock, stock options, SARs and performance-based equity awards	—	2,464	—	2,354
Diluted weighted average common shares outstanding	350,052	350,918	349,787	351,347

Table of Contents

Denbury Resources Inc. Notes to Unaudited Condensed Consolidated Financial Statements

Basic weighted average common shares exclude shares of nonvested restricted stock. As these restricted shares vest, they will be included in the shares outstanding used to calculate basic net income (loss) per common share (although all non-performance-based restricted stock is issued and outstanding upon grant). For purposes of calculating diluted weighted average common shares during the three and nine months ended September 30, 2014, the nonvested restricted stock, stock options, SARs and performance-based equity awards are included in the computation using the treasury stock method, with the deemed proceeds equal to the average unrecognized compensation during the period, the purchase price that the grantee will pay in the future for stock options, and any estimated future tax consequences recognized directly in equity.

The following securities could potentially dilute earnings per share in the future, but were excluded from the computation of diluted net income (loss) per share, as their effect would have been antidilutive:

<i>In thousands</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Stock options and SARs	9,118	3,827	9,858	4,343
Restricted stock and performance-based equity awards	4,988	12	3,392	457

Write-Down of Oil and Natural Gas Properties

The net capitalized costs of oil and natural gas properties are limited to the lower of unamortized cost or the cost center ceiling. The cost center ceiling is defined as (1) the present value of estimated future net revenues from proved oil and natural gas reserves before future abandonment costs (discounted at 10%), based on the average first-day-of-the-month oil and natural gas price for each month during a 12-month rolling period prior to the end of a particular reporting period; plus (2) the cost of properties not being amortized; plus (3) the lower of cost or estimated fair value of unproved properties included in the costs being amortized, if any; less (4) related income tax effects. Our future net revenues from proved oil and natural gas reserves are not reduced for development costs related to the cost of drilling for and developing CO₂ reserves nor those related to the cost of constructing CO₂ pipelines, as those costs have previously been incurred by the Company. Therefore, we include in the ceiling test, as a reduction of future net revenues, that portion of our capitalized CO₂ costs related to CO₂ reserves and CO₂ pipelines that we estimate will be consumed in the process of producing our proved oil and natural gas reserves. The fair value of our oil and natural gas derivative contracts is not included in the ceiling test, as we do not designate these contracts as hedge instruments for accounting purposes. The cost center ceiling test is prepared quarterly.

As a result of the precipitous and continuing decline in NYMEX oil prices since the fourth quarter of 2014, the rolling first-day-of-the-month average oil price for the preceding 12 months, after adjustments for market differentials by field, has fallen throughout 2015, from \$79.55 per Bbl for the first quarter of 2015, to \$68.48 per Bbl for the second quarter of 2015, and \$56.74 per Bbl for the third quarter of 2015. In addition, the first-day-of-the-month average natural gas price for the preceding 12 months, after adjustments for market differentials by field, was \$3.95 per Mcf for the first quarter of 2015, \$3.74 per Mcf for the second quarter of 2015, and \$3.64 per Mcf for the third quarter of 2015. These falling prices have led to our recognizing full cost pool ceiling test write-downs of \$1.8 billion, \$1.7 billion and \$0.2 billion during the three months ended September 30, 2015, June 30, 2015, and March 31, 2015, respectively.

Impairment of Goodwill

We are required to test goodwill for impairment on an interim basis when we determine that it is more likely than not that the fair value of our reporting unit is less than its carrying amount. Our enterprise value (combined market capitalization plus a control premium of 10% and the fair value of our long-term debt) declined by approximately \$2.5 billion between June 30 and September 30, 2015; therefore, we concluded that a goodwill impairment test was required to be performed in the third quarter.

For the goodwill impairment test, we compared the fair value of the reporting unit (enterprise value) to the fair value of its assets and liabilities. Oil and natural gas reserves, which represent the most significant assets requiring valuation, were estimated using the expected present value of future net cash flows method based on September 30, 2015, NYMEX oil and natural gas futures prices for the next five years, adjusted for current price differentials. In addition to future oil and natural gas pricing, the most

Table of Contents

Denbury Resources Inc. *Notes to Unaudited Condensed Consolidated Financial Statements*

significant assumptions impacting the projections of future net cash flows include projections of future rates of production, timing and amount of future development and operating costs, projected availability and cost of CO₂, risk adjustment factors applied to probable and possible oil and natural gas reserve cash flows, projected recovery factors of oil and natural gas reserves, and a weighted average cost of capital discount rate applied to all net cash flows. Because the fair value of the reporting unit (enterprise value) did not exceed the fair value of assets and liabilities, we recorded a goodwill impairment charge of \$1.3 billion during the three months ended September 30, 2015, to fully impair the carrying value of our goodwill. Approximately \$1.0 billion of the \$1.3 billion goodwill balance was associated with the March-2010 merger with Encore Acquisition Company.

Recent Accounting Pronouncements

Debt Issuance Costs. In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-03, *Interest – Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs* ("ASU 2015-03"). ASU 2015-03 requires debt issuance costs related to a recognized debt liability to be presented as a direct reduction of the carrying amount of that debt in the balance sheet, consistent with the presentation of debt discounts. The amendments in this ASU are effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years, and early adoption is permitted. Entities will be required to apply the guidance on a retrospective basis to each period presented as a change in accounting principle. In August 2015, the FASB issued ASU 2015-15, *Interest – Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs* ("ASU 2015-15") which amends ASU 2015-03 to clarify the presentation and subsequent measurement of debt issuance costs associated with line of credit arrangements, such that entities may continue to apply current practice. The adoption of ASU 2015-03 and 2015-15 are currently not expected to have a material effect on our consolidated financial statements, other than balance sheet reclassifications.

Revenue Recognition. In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"). ASU 2014-09 amends the guidance for revenue recognition to replace numerous, industry-specific requirements. The core principle of the ASU is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. The ASU implements a five-step process for customer contract revenue recognition that focuses on transfer of control, as opposed to transfer of risk and rewards. The amendment also requires enhanced disclosures regarding the nature, amount, timing and uncertainty of revenues and cash flows arising from contracts with customers. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers* ("ASU 2015-14") which amends ASU 2014-09 and delays the effective date for public companies, such that the amendments in the ASU are effective for reporting periods beginning after December 15, 2017, and early adoption will be permitted for periods beginning after December 15, 2016. Entities can transition to the standard either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. Management is currently assessing the impact the adoption of ASU 2014-09 and ASU 2015-14 will have on our consolidated financial statements.

Note 2. Long-Term Debt

The following long-term debt and capital lease obligations were outstanding as of the dates indicated:

<i>In thousands</i>	September 30, 2015	December 31, 2014

Long-term debt and capital lease obligations	<u>\$ 3,321,315</u>	<u>\$ 3,535,900</u>

Table of Contents

Denbury Resources Inc. *Notes to Unaudited Condensed Consolidated Financial Statements*

The ultimate parent company in our corporate structure, Denbury Resources Inc. ("DRI"), is the sole issuer of all of our outstanding senior subordinated notes. DRI has no independent assets or operations. Each of the subsidiary guarantors of such notes is 100% owned, directly or indirectly, by DRI, and the guarantees of the notes are full and unconditional and joint and several; any subsidiaries of DRI that are not subsidiary guarantors of certain of such notes are minor subsidiaries.

Bank Credit Facility

In December 2014, we entered into an Amended and Restated Credit Agreement with JPMorgan Chase Bank, N.A., as administrative agent, and other lenders party thereto (the "Bank Credit Agreement"). The Bank Credit Agreement is a senior secured revolving credit facility with a current borrowing base of \$2.6 billion and aggregate lender commitments of \$1.6 billion. Our obligations under the Bank Credit Agreement are guaranteed jointly and severally by each subsidiary of DRI that is 100% owned, directly or indirectly, by DRI. The Bank Credit Agreement is secured by (1) a significant portion of our proved oil and natural gas properties, which are held through DRI's restricted subsidiaries; (2) the pledge of equity interests of such subsidiaries; and (3) a pledge of commodity derivative agreements of DRI and such subsidiaries (as applicable). Loans under the Bank Credit Agreement mature in December 2019. The weighted average interest rate on borrowings outstanding as of September 30, 2015, under the Bank Credit Agreement was 1.8%. The undrawn portion of the aggregate lender commitments under the Bank Credit Agreement is subject to a commitment fee ranging from 0.3% to 0.375% per annum. As of September 30, 2015, we were in compliance with all debt covenants under the Bank Credit Agreement.

Borrowing base redeterminations under our Bank Credit Agreement occur annually, and with our last such redetermination having been completed in early-May 2015, our next scheduled redetermination is set for May 2016. The lenders are entitled, at their election, to request one interim redetermination between annual scheduled redeterminations; however, as of November 4, 2015, there has been no such request to do so. In connection with the borrowing base redetermination completed in early-May 2015, we elected to maintain our aggregate lender commitments at \$1.6 billion; however, due to a reduction in oil prices used by our lenders in determining the borrowing base value of our proved reserves attributable to our oil and natural gas properties, our borrowing base was reduced from the previous level of \$3.0 billion to \$2.6 billion. Because we continue to maintain a significant cushion between our borrowing base and the aggregate lender commitments, and because we had significant availability with respect to our aggregate lender commitments as of September 30, 2015, the borrowing base reduction has no impact on our liquidity.

In conjunction with the May 2015 redetermination, we also entered into the First Amendment to the Bank Credit Agreement (the "First Amendment") to restructure certain financial covenants in 2016, 2017, and 2018 in order to provide more flexibility in managing our balance sheet and managing the credit extended by our lenders if oil prices remain low over the next several years. The covenant changes included in the First Amendment were as follows:

- In 2016 and 2017, suspend the maximum permitted ratio of consolidated total net debt to consolidated EBITDAX covenant of 4.25 to 1.0 and replace it with a maximum permitted ratio of consolidated senior secured debt to consolidated EBITDAX covenant of 2.5 to 1.0 during the same time period. Currently, only debt under our Bank Credit Agreement would be considered consolidated senior secured debt for purposes of this ratio.
- Beginning in the first quarter of 2018, reinstate the ratio of consolidated total net debt to consolidated EBITDAX covenant utilizing an annualized EBITDAX amount for the first quarter of 2018 and building to a trailing four quarters by the end of 2018, with the maximum permitted ratios being 6.0 to 1.0 for the first quarter ended March 31, 2018, 5.5 to 1.0 for the second quarter ended June 30, 2018, and 5.0 to 1.0 for the third and fourth quarters ended September 30 and December 31, 2018, and returning to 4.25 to 1.0 for the first quarter ended March 31, 2019.
- In 2016 and 2017, institute a minimum permitted ratio of consolidated EBITDAX to consolidated interest charges of 2.25 to 1.0.

The restructuring of covenants through the First Amendment was executed in consideration of a fee paid to the lenders. The First Amendment has no impact on the current ratio financial performance covenant, which will remain in place in 2015 and beyond. All of the above descriptions of financial covenants are qualified by the express language and defined terms contained in the Bank Credit Agreement.

Table of Contents

Denbury Resources Inc. *Notes to Unaudited Condensed Consolidated Financial Statements*

2014 Issuance of 5½% Senior Subordinated Notes due 2022

In April 2014, we issued \$1.25 billion of 5½% Senior Subordinated Notes due 2022 (the "5½% Notes"), which were sold at par. The net proceeds, after issuance costs, of \$1.23 billion were used to repurchase or redeem our outstanding \$996.3 million of 8¼% Senior Subordinated Notes due 2020 (the "8¼% Notes") (see *2014 Repurchase and Redemption of 8¼% Senior Subordinated Notes due 2020* below) and to pay down a portion of outstanding borrowings under our previous bank credit agreement.

2014 Repurchase and Redemption of 8¼% Senior Subordinated Notes due 2020

During the second quarter of 2014, we repurchased and redeemed the entire \$996.3 million outstanding principal amount of our 8¼% Notes using a portion of the proceeds from the issuance of the 5½% Notes. We recognized a \$113.9 million loss associated with the debt repurchases during the second quarter of 2014, which loss consists of both premium payments made to repurchase or redeem the 8¼% Notes and the elimination of unamortized debt issuance costs related to these notes. The loss is included in our Unaudited Condensed Consolidated Statements of Operations under the caption "Loss on early extinguishment of debt," and premium payments made to repurchase the notes are classified as a financing cash outflow on our Unaudited Condensed Consolidated Statements of Cash Flows under the caption "Premium paid on repayment of senior subordinated notes."

Note 3. Income Taxes

We evaluate our estimated annual effective income tax rate based on current and forecasted business results and enacted tax laws on a quarterly basis and apply this tax rate to our ordinary income or loss to calculate our estimated tax liability or benefit. As of September 30, 2015, we had \$37.0 million of deferred tax assets associated with State of Louisiana net operating losses. As the result of a new tax law enacted in the State of Louisiana effective June 30, 2015, which limits a company's utilization of certain deductions, including our net operating loss carryforwards, we recognized a tax valuation allowance of \$30.5 million during the second quarter of 2015 to reduce the carrying value of our deferred tax assets. The valuation allowances will remain until the realization of future deferred tax benefits are more likely than not to become utilized. Our effective tax rate for the three months ended September 30, 2015, was lower than our estimated statutory rate, as a significant portion of the book value of our goodwill impaired during the quarter had no related tax basis. Therefore, no corresponding deferred tax benefit was recognized related to that portion of the goodwill impairment. Our effective tax rate for the nine months ended September 30, 2015, was further impacted by the tax valuation allowance discussed above, which also reduced the net deferred tax benefit recognized.

Note 4. Stockholders' Equity

During the second quarter of 2015, we reduced the number of shares of our common stock reported as outstanding by 1,430,819 shares (approximately 0.4% of our outstanding shares at March 31, 2015). This reduction was the result of a correction to properly reflect the number of shares actually issued in the merger with Encore Acquisition Company ("Encore") in March 2010. The stock and cash consideration originally issued and paid in the Encore merger was valued at \$3.0 billion, which would have been reduced by \$22.1 million for this share correction. As a result, we recorded adjustments to our Unaudited Condensed Consolidated Balance Sheet to reflect a decrease in consideration paid in the Encore merger through a reduction of "Goodwill" (\$22.1 million), offset by a reduction in an equal amount of the Company's stockholders' equity (\$22.1 million). We determined that this correction in outstanding shares (1) had no impact on net income (loss) for the second quarter of 2015, our estimated results of operations for the year ending December 31, 2015, or for any prior period, and (2) was not material to our consolidated balance sheet, statement of cash flows, or basic or diluted earnings per common share for the second quarter of 2015, or for any prior period, and therefore we recorded the cumulative effect of correcting these items during the three months ended June 30, 2015.

Dividends

In all four quarters of 2014 and in each of the first three quarters of 2015, the Company's Board of Directors declared quarterly cash dividends of \$0.0625 per common share, or an annual rate of \$0.25 per common share. On September 21, 2015, in light of the continuing low oil price environment and its desire to maintain our financial strength and flexibility, the Company's Board of Directors suspended our quarterly cash dividend, after payment of our third quarter dividend on September 29, 2015. By suspending the dividend, we will free up cash which can be directed to other uses. Dividends totaling \$65.4 million and \$65.2 million were paid to stockholders during the nine months ended September 30, 2015 and 2014, respectively.

Stock Repurchase Program

On September 21, 2015, the Company's Board of Directors reinstated the ability to repurchase shares under our share repurchase program, which authorization was suspended in November of 2014. During the three months ended September 30, 2015, we repurchased 2.7 million shares of Denbury common stock for \$6.9 million, and in October 2015 we repurchased an additional 1.7 million shares of Denbury common stock for \$4.8 million. During the three months ended March 31, 2014, we repurchased 12.4 million shares of Denbury common stock for \$200.4 million. As of November 4, 2015, \$210.1 million remains authorized for use under this repurchase program. Our share repurchases are based on various parameters including, but not limited to, the price of our common stock, oil prices, free cash flow, our leverage or other funding sources available to us. There is no requirement that the remaining balance under the program be utilized, and there is no set expiration date for the repurchase program.

Employee Stock Purchase Program

We previously provided for an Employee Stock Purchase Plan (the "Plan") in which funds from eligible employees, together with Company contributions, were used to purchase previously unissued Denbury common stock or treasury stock that we purchased in the open market for that purpose, in either case, based on the market value of our common stock at the end of each quarter. The Plan was terminated, effective at the end of the offering period ended on March 31, 2015, as all of the previously authorized shares reserved for issuance under the Plan had been issued.

Note 5. Commodity Derivative Contracts

We do not apply hedge accounting treatment to our oil and natural gas derivative contracts; therefore, the changes in the fair values of these instruments are recognized in income in the period of change. These fair value changes, along with the settlements of expired contracts, are shown under "Commodity derivatives expense (income)" in our Unaudited Condensed Consolidated Statements of Operations.

Historically, we have entered into various oil and natural gas derivative contracts to provide an economic hedge of our exposure to commodity price risk associated with anticipated future oil and natural gas production and to provide more certainty to our future cash flows. We do not hold or issue derivative financial instruments for trading purposes. Generally, these contracts have consisted of various combinations of price floors, collars, three-way collars, fixed-price swaps and fixed-price swaps enhanced with a sold put. The production that we hedge has varied from year to year depending on our levels of debt, financial strength and expectation of future commodity prices. For the past several years, we have generally hedged a substantial portion of our forecasted production over an approximately 18 month to two year future period, as we believed it was beneficial to protect our future cash flows at then-projected oil prices for those future periods. However, during the significant and rapid decline in oil prices in the fourth quarter of 2014 and the first quarter of 2015, we deferred entering into new derivative contracts; we entered into limited oil hedging positions during the second quarter of 2015 covering the second and third quarters of 2016 as a result of the slight recovery in oil prices; and we have not entered into any additional hedges since the second quarter of 2015. Consequently, we currently have less of our production hedged and for a shorter future time period than we have generally had over the last several years.

We manage and control market and counterparty credit risk through established internal control procedures that are reviewed on an ongoing basis. We attempt to minimize credit risk exposure to counterparties through formal credit policies, monitoring procedures and diversification, and all of our commodity derivative contracts are with parties that are lenders under our Bank Credit Agreement (or affiliates of such lenders). As of September 30, 2015, all of our outstanding derivative contracts were subject to enforceable master netting arrangements whereby payables on those contracts can be offset against receivables from separate derivative contracts with the same counterparty. It is our policy to classify derivative assets and liabilities on a gross basis on our balance sheets, even if the contracts are subject to enforceable master netting arrangements.

Table of Contents

Denbury Resources Inc.
Notes to Unaudited Condensed Consolidated Financial Statements

The following table summarizes our commodity derivative contracts as of September 30, 2015, none of which are classified as hedging instruments in accordance with the Financial Accounting Standards Board Codification ("FASC") *Derivatives and Hedging* topic:

Months	Index Price	Volume ⁽²⁾	Range ⁽³⁾		Contract Prices ⁽¹⁾

- (1) Contract prices are stated in \$/Bbl and \$/MMBtu for oil and natural gas contracts, respectively.
- (2) Contract volumes are stated in Bbls/d and MMBtus/d for oil and natural gas contracts, respectively.
- (3) Ranges presented for fixed-price swaps and enhanced swaps represent the lowest and highest fixed prices of all open contracts for the period presented. For collars and three-way collars, ranges represent the lowest floor price and highest ceiling price for all open contracts for the period presented.

Table of Contents

Denbury Resources Inc.

Notes to Unaudited Condensed Consolidated Financial Statements

- (4) An enhanced swap is a fixed-price swap contract combined with a sold put feature (at a lower price) with the same counterparty. The value associated with the sold put is used to increase or enhance the fixed price of the swap. At the contract settlement date, (1) if the index price is higher than the swap price, we pay the counterparty the difference between the index price and swap price for the contracted volumes, (2) if the index price is lower than the swap price but at or above the sold put price, the counterparty pays us the difference between the index price and the swap price for the contracted volumes and (3) if the index price is lower than the sold put price, the counterparty pays us the difference between the swap price and the sold put price for the contracted volumes.
- (5) A three-way collar is a costless collar contract combined with a sold put feature (at a lower price) with the same counterparty. The value received for the sold put is used to enhance the contracted floor and ceiling price of the related collar. At the contract settlement date, (1) if the index price is higher than the ceiling price, we pay the counterparty the difference between the index price and ceiling price for the contracted volumes, (2) if the index price is between the floor and ceiling price, no settlements occur, (3) if the index price is lower than the floor price but at or above the sold put price, the counterparty pays us the difference between the index price and the floor price for the contracted volumes and (4) if the index price is lower than the sold put price, the counterparty pays us the difference between the floor price and the sold put price for the contracted volumes.

Note 6. Fair Value Measurements

The FASC *Fair Value Measurement* topic defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (often referred to as the "exit price"). We utilize market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. We primarily apply the income approach for recurring fair value measurements and endeavor to utilize the best available information. Accordingly, we utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. We are able to classify fair value balances based on the observability of those inputs. The FASC establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

- Level 1 – Quoted prices in active markets for identical assets or liabilities as of the reporting date.
- Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reported date. Level 2 includes those financial instruments that are valued using models or other valuation methodologies. Instruments in this category include non-exchange-traded oil and natural gas derivatives that are based on NYMEX pricing and fixed-price swaps that are based on regional pricing other than NYMEX (e.g., Light Louisiana Sweet). The fixed-price swap features of our enhanced swaps are valued using a discounted cash flow model based upon forward commodity price curves. Our costless collars and the sold put features of our enhanced oil swaps and three-way collars are valued using the Black-Scholes model, an industry standard option valuation model that takes into account inputs such as contractual prices for the underlying instruments, maturity, quoted forward prices for commodities, interest rates, volatility factors and credit worthiness, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.
- Level 3 – Pricing inputs include significant inputs that are generally less observable. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value. At September 30, 2015, instruments in this category include non-exchange-traded enhanced swaps, costless collars and three-way collars that are based on regional pricing other than NYMEX (e.g., Light Louisiana Sweet). The valuation models utilized for enhanced swaps, costless collars and three-way collars are consistent with the methodologies described above; however, the implied volatilities utilized in the valuation of Level 3 instruments are developed using a benchmark, which is considered a significant unobservable input. An increase or decrease of 100 basis points in the implied volatility inputs utilized in our fair value measurement would result in a change of approximately \$0.1 million in the fair value of these instruments as of September 30, 2015.

Table of Contents

Denbury Resources Inc. Notes to Unaudited Condensed Consolidated Financial Statements

We adjust the valuations from the valuation model for nonperformance risk, using our estimate of the counterparty's credit quality for asset positions and our credit quality for liability positions. We use multiple sources of third-party credit data in determining counterparty nonperformance risk, including credit default swaps.

The following table sets forth, by level within the fair value hierarchy, our financial assets and liabilities that were accounted for at fair value on a recurring basis as of the periods indicated:

<i>In thousands</i>	Fair Value Measurements Using:			
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
September 30, 2015				
Assets:				
Oil and natural gas derivative contracts – current	\$ —	\$ 116,557	\$ 82,874	\$ 199,431
Total Assets	\$ —	\$ 116,557	\$ 82,874	\$ 199,431
December 31, 2014				
Assets:				
Oil and natural gas derivative contracts – current	\$ —	\$ 283,238	\$ 157,121	\$ 440,359
Oil and natural gas derivative contracts – long-term	—	34,862	31,325	66,187
Total Assets	\$ —	\$ 318,100	\$ 188,446	\$ 506,546

Since we do not apply hedge accounting for our commodity derivative contracts, any gains and losses on our assets and liabilities are included in "Commodity derivatives expense (income)" in the accompanying Unaudited Condensed Consolidated Statements of Operations.

Level 3 Fair Value Measurements

The following table summarizes the changes in the fair value of our Level 3 assets and liabilities for the three and nine months ended September 30, 2015 and 2014:

<i>In thousands</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Fair value of Level 3 instruments, beginning of period	\$ 112,358	\$ (39,116)	\$ 188,446	\$ 6,709
Fair value adjustments on commodity derivatives	21,089	61,411	38,872	15,586
Receipts on settlements of commodity derivatives	(50,573)	—	(144,444)	—
Fair value of Level 3 instruments, end of period	\$ 82,874	\$ 22,295	\$ 82,874	\$ 22,295

The amount of total gains for the period included in earnings attributable to the change in unrealized gains relating to assets still held at the reporting date	\$ 15,332	\$ 61,411	\$ 25,456	\$ 15,586
--	-----------	-----------	-----------	-----------

We utilize an income approach to value our Level 3 enhanced swaps, costless collars and three-way collars. We obtain and ensure the appropriateness of the significant inputs to the calculation, including contractual prices for the underlying instruments, maturity, forward prices for commodities, interest rates, volatility factors and credit worthiness, and the fair value estimate is

Table of Contents

Denbury Resources Inc. *Notes to Unaudited Condensed Consolidated Financial Statements*

prepared and reviewed on a quarterly basis. The following table details fair value inputs related to implied volatilities utilized in the valuation of our Level 3 oil derivative contracts:

	Fair Value at 9/30/2015 (in thousands)	Valuation Technique	Unobservable Input	Volatility Range
Oil derivative contracts	\$ 82,874	Discounted cash flow / Black-Scholes	Volatility of Light Louisiana Sweet for settlement periods beginning after September 30, 2015	30.2% – 37.5%

Other Fair Value Measurements

The carrying value of loans under our Bank Credit Agreement approximate fair value, as they are subject to short-term floating interest rates that approximate the rates available to us for those periods. We use a market approach to determine fair value of our fixed-rate long-term debt using observable market data. The fair values of our senior subordinated notes are based on quoted market prices, resulting in an estimated fair value of our debt as of September 30, 2015 and December 31, 2014, excluding pipeline financing and capital lease obligations, of \$1,855.0 million and \$2,938.6 million, respectively. We have other financial instruments consisting primarily of cash, cash equivalents, short-term receivables and payables that approximate fair value due to the nature of the instrument and the relatively short maturities.

Note 7. Commitments and Contingencies

We are involved in various lawsuits, claims and regulatory proceedings incidental to our businesses. We are also subject to audits for various taxes (income, sales and use, and severance) in the various states in which we operate, and from time to time receive assessments for potential taxes that we may owe. While we currently believe that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on our financial position, results of operations or cash flows, litigation is subject to inherent uncertainties. Although a single or multiple adverse rulings or settlements could possibly have a material adverse effect on our finances, we only accrue for losses from litigation and claims if we determine that a loss is probable and the amount can be reasonably estimated.

Delhi Field Release

In June 2013, a release of well fluids, consisting of a mixture of carbon dioxide, saltwater, natural gas and oil, was discovered (and reported) within an area of the Denbury-operated Delhi Field located in northern Louisiana. Our remediation efforts with respect to such release were completed during the fourth quarter of 2013; however, we continue to monitor the impacted area to confirm the effectiveness of the remediation efforts. Virtually all of our total recorded cost of \$130.8 million has been incurred.

We maintain insurance policies to cover certain costs, damages and claims related to releases of well fluids and remediation. We received a \$25.0 million cost reimbursement in October 2014 related to the Delhi Field release and remediation from our insurance carrier providing the first layer of our excess liability insurance coverage, and an additional \$4.5 million cost reimbursement in August 2015 from our insurance carrier providing well control coverage. We have not reached any agreement with our remaining carriers as to further reimbursements, but given our belief that under our policies we are entitled to reimbursement of between approximately one-third and two-thirds of our total costs, we have filed suit to pursue further reimbursements, the ultimate outcome of which cannot be predicted.

In March 2015, Evolution Petroleum Company ("Evolution"), the parent of the entity which sold Denbury Onshore, LLC ("Denbury Onshore") its original interest in Delhi Field, filed an amended petition in a lawsuit which has been pending in the Texas district court in Houston since December 2013. Originally, that lawsuit involved ongoing disputes between Denbury Onshore and Evolution regarding the terms of the purchase documents under which Denbury Onshore bought its original Delhi Field interest, including disputes regarding allocation of costs in determining "payout" as defined in the agreements, and the extent and terms of assignment of reversionary interests in the unit back to Evolution following payout, along with related contractual terms. The amended petition added allegations of negligence and gross negligence against Denbury Onshore in connection with the June 2013 Delhi Field release, and for the first time estimated its damages attributable to its allegations in the case as exceeding \$200 million.

Table of Contents

Denbury Resources Inc.
Notes to Unaudited Condensed Consolidated Financial Statements

The amended petition also adds a claim for unspecified punitive damages. There has only been limited discovery in the case to date, and Evolution has not specified the basis for the amount of its claimed damages estimate. The case is currently set for trial in April 2016. We believe Evolution's claims with respect to this matter are without merit and intend to vigorously defend against them and pursue our rights under the purchase documents.

Note 8. Additional Balance Sheet Details**Trade and Other Receivables, Net**

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our Unaudited Condensed Consolidated Financial Statements and Notes thereto included herein and our Consolidated Financial Statements and Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014 (the "Form 10-K"), along with *Management's Discussion and Analysis of Financial Condition and Results of Operations* contained in the Form 10-K. Any terms used but not defined herein have the same meaning given to them in the Form 10-K. Our discussion and analysis includes forward-looking information that involves risks and uncertainties and should be read in conjunction with *Risk Factors* under Item 1A of Part II of this report, along with *Forward-Looking Information* at the end of this section for information on the risks and uncertainties that could cause our actual results to be materially different than our forward-looking statements.

OVERVIEW

Denbury is an independent oil and natural gas company with operations focused in two key operating areas: the Gulf Coast and Rocky Mountain regions. Our goal is to increase the value of our properties through a combination of exploitation, drilling and proven engineering extraction practices, with the most significant emphasis relating to CO₂ enhanced oil recovery operations.

Oil Price Decline and Impact on Our Business. Oil prices generally constitute the single largest variable in our operating results. Although oil prices have historically been volatile, during the fourth quarter of 2014 and continuing throughout 2015, oil prices have dropped significantly, with NYMEX prices declining from \$107 per Bbl in June 2014 to less than \$44 per Bbl in March 2015, and ending September 2015 at \$45 per Bbl. The following charts illustrate the fluctuations in our realized oil and natural gas prices, excluding the impact of commodity derivative settlements, during 2014 and the first three quarters of 2015.

Average realized prices	Three Months Ended						
	3/31/2014	6/30/2014	9/30/2014	12/31/2014	3/31/2015	6/30/2015	9/30/2015
Oil price per Bbl	\$ 97.69	\$ 100.04	\$ 94.78	\$ 70.80	\$ 46.02	\$ 56.92	\$ 45.74
Natural gas price per Mcf	4.71	4.39	3.55	3.54	2.54	2.44	2.40

In response to the decline in oil prices, we have made adjustments to our business to preserve our financial strength and flexibility. These adjustments include: (1) reducing our original projected 2015 development capital spending to less than half of 2014 levels, and further reducing our projected development capital spending by an additional 20% during 2015, (2) reducing costs and identifying new innovation and improvement ideas for our fields, which has resulted in meaningful decreases to date in most categories of our lease operating expenses and general and administrative expenses, and cost savings on capital projects, (3) modifying certain of our bank covenants applicable to the 2016, 2017 and 2018 periods to mitigate concern around our ability to access our bank credit line if oil prices remain low for an extended period of time, and (4) most recently, suspending our quarterly cash dividend after payment of our third quarter dividend on September 29, 2015 (see *Capital Resources and Liquidity – Dividends* below for further discussion), which will free up approximately \$22 million of cash each quarter that was historically paid out in dividends, which can be directed to other uses including, among other things, debt reduction, increases in capital spending, or

repurchases of shares of Denbury common stock. As a result of these adjustments and the commodity hedges we have in place for 2015, we have generated cash flow from operations in excess of capital expenditures and dividends, with which we have been able to reduce our credit facility borrowings from \$395.0 million at December 31, 2014, to \$210.0 million at September 30, 2015.

Operating Highlights. Our financial results have been significantly impacted by the decrease in realized oil prices as highlighted above, which decreased from an average of \$94.78 per Bbl in the third quarter of 2014 to \$45.74 in the third quarter of 2015. During the third quarter of 2015, we recognized a net loss of \$2.2 billion, or \$6.41 per diluted common share, compared to net income of \$268.7 million, or \$0.77 per diluted common share, during the third quarter of 2014. The change in income between the third quarter of 2015 and 2014 was primarily due to a full cost pool ceiling test write-down of our oil and natural gas properties totaling \$1.8 billion (\$1.1 billion net of tax) (see *Write-Down of Oil and Natural Gas Properties* below) and a goodwill impairment charge totaling \$1.3 billion (\$1.2 billion net of tax) (see *Impairment of Goodwill* below). Other significant changes between the third quarter of 2015 and 2014 were a \$331.6 million (53%) decline in our oil and natural gas revenues between the periods, which was primarily oil-price related, and a \$160.2 million decrease in commodity derivatives income, offset in part by a \$41.3 million (27%) reduction in lease operating expense, a \$25.2 million (17%) decrease in depletion, depreciation, and amortization, a \$14.4 million (36%) decrease in taxes other than income, and a \$7.5 million (18%) decrease in general and administrative expenses. The \$160.2 million decrease in commodity derivatives income between the two periods was due to a \$345.8 million loss associated with noncash fair value commodity adjustments, offset in part by a \$185.6 million increase in income from settlements of derivative contracts.

We generated \$272.7 million of cash flows from operating activities in the third quarter of 2015, compared to \$289.0 million in the second quarter of 2015 and \$340.4 million in the prior-year third quarter. Despite sequential-quarter declines in oil prices which contributed to a \$76.5 million decrease in oil and natural gas revenues, our cash flows from operations decreased by only \$16.3 million between the second and third quarters of 2015, the largest reason for which related to positive changes in derivative settlements, as well as reductions in lease operating expenses, taxes other than income, and general and administrative expenses. The decrease in cash flows from operations between the third quarter of 2015 and 2014 was due primarily to lower oil prices, which caused a decrease in oil revenues, partially offset by significant positive changes in derivative settlements and, to a lesser extent, reductions in lease operating expenses, taxes other than income, CO₂ and helium discovery and operating expenses, general and administrative expenses, and interest expense. Despite recent significant decreases in oil prices, based upon oil futures prices at the end of October 2015, we currently expect that for full-year 2015, we will generate significant cash flow from operations above and beyond our capital expenditures and dividends.

During the third quarter of 2015, our oil and natural gas production, which was 95% oil, averaged 71,410 BOE/d, compared to an average of 73,810 BOE/d produced during the third quarter of 2014 and 73,716 BOE/d during the second quarter of 2015. Oil production from our tertiary operations during the third quarter of 2015 decreased 793 Bbls/d (2%) compared to tertiary production levels in the same period in 2014, and decreased 1,750 Bbls/d (4%) when comparing tertiary production between the third quarter of 2015 and second quarter of 2015. The change in our total production between the comparative third quarters was primarily a result of natural production declines at our mature tertiary properties in the Gulf Coast region, a decline at Cedar Creek Anticline Field, a temporary production decline at Tinsley Field, and a contractual reversionary interest assignment at Delhi Field, offset in part by production increases at Oyster Bayou Field and Bell Creek Field. On a sequential quarterly basis, the production decline was primarily due to the decline at Tinsley and Cedar Creek Anticline fields, partially offset by a production increase at Bell Creek Field. See *Results of Operations – Production* for further discussion.

Our average realized oil price per barrel, excluding the impact of commodity derivative contracts, was \$45.74 per Bbl during the third quarter of 2015, a decrease of 52% compared to \$94.78 per Bbl realized during the third quarter of 2014 and a decrease of 20% compared to \$56.92 per Bbl realized during the second quarter of 2015. The oil price we realized relative to NYMEX oil prices (our NYMEX oil price differential) was \$0.96 per Bbl below NYMEX prices in the third quarter of 2015, compared to a negative \$2.53 per Bbl NYMEX differential in the third quarter of 2014, and a negative \$0.89 per Bbl NYMEX differential in the second quarter of 2015. The improvement in our oil price differential in comparison to its level in the third quarter of 2014 was principally due to improvement in the Rocky Mountain region discount relative to NYMEX oil prices.

One of our primary focuses in 2014 and 2015 has been to reduce costs throughout the organization, through a number of internal initiatives. Our efforts have proven successful, and our lease operating expenses in the third quarter of 2015, normalized to exclude insurance and other special reimbursements (see *Results of Operations – Production Expenses* for further discussion),

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

were less than \$19.50 per BOE, a decrease of 14% when compared to per-BOE levels in the fourth quarter of 2014. In addition, our recurring lease operating expenses per BOE decreased each sequential quarter in 2014 and in the first three quarters of 2015 and decreased a total of 26% between the fourth quarter of 2013 and the third quarter of 2015, with decreases realized in most categories of lease operating expenses, the most significant of which included workover costs, power costs, CO₂ costs, and certain third-party contractor and vendor costs. On a sequential-quarter basis, lease operating expenses per BOE, excluding insurance and other reimbursements, decreased slightly between the second quarter of 2015 and the third quarter of 2015, and our goal is to continue to find efficiencies in both capital project costs and per-barrel operating costs.

Write-Down of Oil and Natural Gas Properties. Due to a continued decline in the first-day-of-the-month average oil and natural gas price for each quarterly 12-month rolling period in 2015, we recognized full cost pool ceiling test write-downs of \$1.8 billion, \$1.7 billion and \$0.2 billion during the three months ended September 30, 2015, June 30, 2015, and March 31, 2015, respectively. See Note 1, *Basis of Presentation – Write-Down of Oil and Natural Gas Properties*, to the Unaudited Condensed Consolidated Financial Statements, and *Results of Operations – Write-Down of Oil and Natural Gas Properties*, for additional information regarding the ceiling test.

Impairment of Goodwill. Based on the results of our goodwill impairment test performed during the third quarter of 2015, we recorded a goodwill impairment charge of \$1.3 billion to fully impair the carrying value of our goodwill. Between June 30 and September 30, 2015, the fair value of our reporting unit (enterprise value) declined at a rate greater than the decline in NYMEX oil futures prices, which is a significant factor impacting the value of our oil and natural gas reserves, leading to the goodwill impairment. See Note 1, *Basis of Presentation – Impairment of Goodwill*, to the Unaudited Condensed Consolidated Financial Statements, and *Results of Operations – Impairment of Goodwill* below, for additional information regarding the goodwill impairment test.

Impact of Commodity Price Decline on Proved Oil and Natural Gas Reserves Quantities. Declines in commodity prices may materially impact estimated quantities of proved reserves, as certain reserves may reach the point at which they become uneconomic to produce earlier than they would otherwise. The SEC requires proved reserves to be determined based on average first-day-of-the-month oil and natural gas prices for the trailing 12-month period. Using these prices, our total proved reserves at December 31, 2014, were 437.7 MMBOE, of which 83% was oil and 17% was natural gas. During the first nine months of 2015, the average oil price used in estimating our proved reserves declined from \$91.89 per Bbl at December 31, 2014, to \$56.74 per Bbl at September 30, 2015, and for natural gas declined from \$4.30 per Mcf at December 31, 2014, to \$3.64 per Mcf at September 30, 2015. These oil and natural gas price changes resulted in an estimated decline of approximately 6% (25 MMBOE) in our proved reserves from December 31, 2014, through September 30, 2015. If prices for the fourth quarter of 2015 approximate recent commodity futures prices, the average NYMEX prices used to estimate our proved reserves at December 31, 2015, would likely decrease further, to approximately \$50 per Bbl for oil and \$2.75 per Mcf for natural gas. Based on these additional estimated price declines, it is reasonably likely that we could experience further negative revisions in our proved oil and natural gas reserves due to price declines. Our year-end reserves are still being evaluated, and it is therefore difficult to quantify the magnitude of any additional negative reserve revisions due to price; however, we currently expect such negative reserve revisions to be less than 10% of our proved reserve quantities at September 30, 2015. This amount could potentially be higher if natural gas prices were to decrease to a level that would indicate our 61.3 MMBOE of proved natural gas reserves at Riley Ridge were determined to be uneconomic. The actual fourth quarter 2015 reserve revision could vary from the estimated range of revisions for several reasons, including differences in actual commodity prices from commodity futures prices and changes in oil and natural gas price differentials, forecasted production rates, forecasted operating and capital costs, changes in development plans, and other key assumptions included within the estimate of proved oil and natural gas reserves.

CAPITAL RESOURCES AND LIQUIDITY

Overview. Our primary sources of capital and liquidity are our cash flows from operations and availability for borrowings under our bank credit facility. Our business is capital intensive, and it is common for oil and natural gas companies our size to reinvest most or all of their cash flow into developing new assets. During 2014 and the first three quarters of 2015, we managed our expenditures such that our cash flow from operations more than covered our capital expenditures and dividends, and based upon oil futures prices at the end of October 2015, we currently expect to generate cash flow from operations for full-year 2015 above and beyond our capital expenditures and dividends. Our cash flow from operations during the nine months ended September 30, 2015 was \$699.4 million, which was \$321.5 million higher than our incurred development capital expenditures and dividends

during the first nine months of the year. We used this excess cash flow from operations primarily to reduce debt, acquire oil and gas properties, and cover working capital outflows, including cash outflows to cover accruals for capital items as of December 31, 2014. In future periods, we currently expect that we would use excess cash flow for, among other things, increases in capital spending, debt repayment or repurchases, or stock repurchases.

As discussed in the *Overview* above, we have been proactive in adjusting our 2015 capital spending and dividend plans in connection with the current lower oil price environment. We project that we will have adequate capital resources and liquidity for the foreseeable future because (1) we have significant borrowing capacity on our bank credit facility and significant cushion between our current \$2.6 billion borrowing base and the \$1.6 billion of commitments we have asked the banks to extend to us (see Note 2, *Long-Term Debt*, and *Bank Credit Facility* below); (2) we have commodity derivative contracts in place to cover a portion of our forecasted oil production for the fourth quarter of 2015 and the first half of 2016 that will lessen the impact of the current lower oil price environment (see Note 5, *Commodity Derivative Contracts*, to the Unaudited Condensed Consolidated Financial Statements for further details regarding the prices and volumes of our commodity derivative contracts); (3) generally, we plan to fund our projected capital expenditures with cash flows from operations; (4) we believe that we can significantly reduce our capital expenditures for some time, as we have done in 2015, and still maintain relatively flat or slightly lower production levels as a result of the unique characteristics of CO₂ EOR operations; and (5) the maturity dates of all but a minor amount of our senior subordinated notes occur approximately six or more years in the future and carry attractive fixed interest rates ranging between 4½% and 6½%.

If oil prices remain at relatively low levels beyond 2015, our cash flows from operations will likely be significantly lower than current levels, as our commodity derivative contracts presently in place for 2016 principally cover production during the first half of the year and cover significantly less forecasted oil production at lower prices than our 2015 contracts. Therefore, we continue to focus on reducing our operating and administrative costs so as to preserve as much of our profit margin as possible in this lower oil price environment, and if this low oil price environment persists, we intend to continue to make adjustments to our capital spending plans to preserve our financial health. Fortunately, some of our costs, such as CO₂ purchases and production taxes, adjust proportionally with changes in the price of oil. We also expect that our cost of services and equipment will continue to come down in this lower oil price environment, but this likely will not reflect as large of a percentage decrease as the decrease in the price of oil. As we have done up to this point in 2015, we believe that we can reduce capital spending and maintain production at relatively flat or slightly lower production levels for some time.

Capital Spending. During 2015, we reduced our anticipated full-year 2015 capital budget, excluding acquisitions, from \$550 million to \$475 million, comprised of a \$95 million reduction in development spending, partially offset by a \$20 million increase in other capitalized items. Our \$475 million budget includes approximately \$105 million in capitalized internal acquisition, exploration and development costs; capitalized interest; and pre-production startup costs associated with new tertiary floods. This combined 2015 capital budget amount, excluding acquisitions, is comprised of the following:

- \$225 million allocated for tertiary oil field expenditures;
- \$100 million allocated for other areas, primarily non-tertiary oil field expenditures;
- \$30 million to be spent on CO₂ sources;
- \$15 million for pipeline construction; and
- \$105 million for other capital items such as capitalized internal acquisition, exploration and development costs; capitalized interest; and pre-production startup costs associated with new tertiary floods.

During the nine months ended September 30, 2015, we incurred capital expenditures of \$312.5 million, excluding acquisitions. See additional detail on our expenditures in the *Capital Expenditure Summary* below. Based on oil and natural gas commodity futures prices in early-November 2015 and our current production forecast, we currently anticipate that our 2015 cash flows from operations will be in excess of our combined 2015 capital budget and dividend payments. During the first nine months of 2015, we used excess cash flow from operations to pay down borrowings on our bank credit facility, with a total reduction of \$185.0 million from the level outstanding as of December 31, 2014. If prices were to decrease further from October 2015 levels, or changes in operating results were to cause us to have a significant reduction in fourth quarter 2015 operating cash flows, we could reduce our capital expenditures; however, we currently have ample availability on our bank credit facility to cover any potential foreseeable shortfall. If we further reduce our capital spending due to lower cash flows, any sizeable reduction could lower our anticipated production levels in future years. Based on current 2016 oil futures prices as of late-October 2015 and our

Table of Contents

Denbury Resources Inc. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

projections at this time, we currently anticipate that our 2016 capital budget, excluding acquisitions, will be between \$300 million and \$350 million.

Capital Expenditure Summary. The following table reflects incurred capital expenditures (including accrued capital) for the nine months ended September 30, 2015 and 2014:

<i>In thousands</i>	Nine Months Ended	
	September 30,	
	2015	2014
Capital expenditures by project		
Tertiary oil fields	\$ 133,439	\$ 442,810
Non-tertiary fields	75,199	186,708
Capitalized interest and internal costs ⁽¹⁾	72,235	67,437
Oil and natural gas capital expenditures	280,873	696,955
CO ₂ pipelines	10,135	24,612
CO ₂ sources ⁽²⁾	17,686	37,502
CO ₂ capitalized interest and other	3,816	2,831
Capital expenditures, before acquisitions	312,510	761,900
Acquisitions of oil and natural gas properties	22,755	1,683
Capital expenditures, total	\$ 335,265	\$ 763,583

(1) Includes capitalized internal acquisition, exploration and development costs; capitalized interest; and pre-production startup costs associated with new tertiary floods.

(2) Includes capital expenditures related to the Riley Ridge gas processing facility.

For the first nine months of 2015 and 2014, our capital expenditures and property acquisitions were fully funded with cash flows from operations.

Bank Credit Facility. Borrowing base redeterminations under our Bank Credit Agreement occur annually, and with our last such redetermination having been completed in early-May 2015, our next scheduled redetermination is set for May 2016. The lenders are entitled, at their election, to request one interim redetermination between annual scheduled redeterminations; however, as of November 4, 2015, there has been no such request to do so. In connection with the borrowing base redetermination completed in early-May 2015, we elected to maintain our aggregate lender commitments at \$1.6 billion; however, due to a reduction in oil prices used by our lenders in determining the borrowing base value of our proved reserves attributable to our oil and natural gas properties, our borrowing base was reduced from the previous level of \$3.0 billion to \$2.6 billion. Because we continue to maintain a \$1.0 billion cushion between our borrowing base and the aggregate lender commitments, even after this borrowing base reduction, and because we had availability of \$1.4 billion with respect to our aggregate lender commitments as of September 30, 2015, this borrowing base reduction has no impact on our liquidity.

For 2015, our Bank Credit Agreement contains certain restrictive covenants, plus two principal financial performance covenants to maintain (1) a ratio of consolidated total net debt to consolidated EBITDAX of not more than 4.25 to 1.0 and (2) a ratio of consolidated current assets to consolidated current liabilities ("current ratio") not less than 1.0. For these financial performance covenant calculations as of September 30, 2015, our ratio of consolidated total net debt to consolidated EBITDAX was 2.86 to 1.0, and our current ratio was 4.56. We currently project to continue to be in compliance with these covenants through the remainder of 2015, and based upon our current forecasted levels of production and costs, assuming oil and natural gas prices remain at or above commodity futures prices as of late-October 2015 (approximating \$50 per Bbl during 2016), we would also anticipate continuing to be in compliance with our bank covenants during 2016.

In conjunction with the May 2015 redetermination, we entered into the First Amendment to the Bank Credit Agreement (the "First Amendment") to restructure certain financial covenants in 2016, 2017 and 2018 in order to provide more flexibility in

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

managing our balance sheet and managing the credit extended by our lenders if oil prices remain low over the next several years. The covenant changes included in the First Amendment were as follows:

- In 2016 and 2017, suspend the maximum permitted ratio of consolidated total net debt to consolidated EBITDAX covenant of 4.25 to 1.0 and replace it with a maximum permitted ratio of consolidated senior secured debt to consolidated EBITDAX covenant of 2.5 to 1.0 during the same time period. Currently, only debt under our Bank Credit Agreement would be considered consolidated senior secured debt for purposes of this ratio. If this covenant had been in place as of September 30, 2015, our ratio of senior secured debt to consolidated EBITDAX would have been 0.18 to 1.0 as of that date.
- Beginning in the first quarter of 2018, reinstate the ratio of consolidated total net debt to consolidated EBITDAX covenant utilizing an annualized EBITDAX amount for the first quarter of 2018 and building to a trailing four quarters by the end of 2018, with the maximum permitted ratios being 6.0 to 1.0 for the first quarter ended March 31, 2018, 5.5 to 1.0 for the second quarter ended June 30, 2018, and 5.0 to 1.0 for the third and fourth quarters ended September 30 and December 31, 2018, and returning to 4.25 to 1.0 for the first quarter ended March 31, 2019.
- In 2016 and 2017, institute a minimum permitted ratio of consolidated EBITDAX to consolidated interest charges of 2.25 to 1.0. If this covenant had been in place as of September 30, 2015, our ratio of consolidated EBITDAX to consolidated interest charges would have been 6.03 to 1.0 as of that date.

The restructuring of covenants through the First Amendment was executed in consideration of a fee paid to the lenders. The First Amendment has no impact on the current ratio financial performance covenant, which will remain in place in 2015 and beyond. All of the above descriptions of financial covenants are qualified by the express language and defined terms contained in the Bank Credit Agreement.

Dividends. In all four quarters of 2014 and in each of the first three quarters of 2015, the Company's Board of Directors declared quarterly cash dividends of \$0.0625 per common share. On September 21, 2015, in light of the continuing low oil price environment and its desire to maintain our financial strength and flexibility, the Company's Board of Directors suspended our quarterly cash dividend, after payment of our third quarter dividend on September 29, 2015. By suspending the dividend, we will free up approximately \$22 million of cash each quarter that was historically paid out in dividends, which can be directed to other uses. Dividends totaling \$65.4 million and \$65.2 million were paid to stockholders during the nine months ended September 30, 2015 and 2014, respectively.

Stock Repurchase Program. On September 21, 2015, the Company's Board of Directors reinstated the ability to repurchase shares under our share repurchase program, which authorization was suspended in November of 2014. During September and October of 2015, we repurchased 4.4 million shares of Denbury common stock for \$11.8 million. We have spent a total of \$951.8 million to repurchase 64.4 million shares of our common stock under this program between October 2011 and November 4, 2015 (approximately 16.0% of our outstanding shares at September 30, 2011), leaving us with \$210.1 million available for future purchases. Our share repurchases are based on various parameters including, but not limited to, the price of our common stock, oil prices, free cash flow, our leverage or other funding sources available to us. There is no requirement that the remaining balance under the program be utilized, and there is no set expiration date for the repurchase program. We anticipate that any additional repurchases would be funded out of our excess cash flow and in a manner that would not increase bank borrowings beyond the year-end 2014 level. See Note 4, *Stockholders' Equity*, to the Unaudited Condensed Consolidated Financial Statements for further discussion.

Insurance Recoveries to Cover Costs of 2013 Delhi Field Release. Our remediation efforts related to the 2013 release of well fluids at the Denbury-operated Delhi Field were completed during the fourth quarter of 2013, and as of September 30, 2015, virtually all of our total recorded cost of \$130.8 million had been incurred.

We maintain insurance policies to cover certain costs, damages and claims related to releases of well fluids and remediation. We received a \$25.0 million cost reimbursement in October 2014 related to the Delhi Field release and remediation from our insurance carrier providing the first layer of our excess liability insurance coverage, and an additional \$4.5 million cost reimbursement in August 2015 from our insurance carrier providing well control coverage. We have not reached any agreement with our remaining carriers as to further reimbursements, but given our belief that under our policies we are entitled to reimbursement of between approximately one-third and two-thirds of our total costs, we have filed suit to pursue further reimbursements, the ultimate outcome of which cannot be predicted.

Off-Balance Sheet Arrangements. Our off-balance sheet arrangements include operating leases for office space and various obligations for development and exploratory expenditures that arise from our normal capital expenditure program or from other transactions common to our industry, none of which are recorded on our balance sheet. In addition, in order to recover our undeveloped proved reserves, we must also fund the associated future development costs estimated in our proved reserve reports.

Our commitments and obligations consist of those detailed as of December 31, 2014, in our Form 10-K under *Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Commitments and Obligations*.

RESULTS OF OPERATIONS

Our tertiary operations represent a significant portion of our overall operations and are our primary long-term strategic focus. The economics of a tertiary field and the related impact on our financial statements differ from a conventional oil and gas play, and we have outlined certain of these differences in our Form 10-K and other public disclosures. Our focus on these types of operations impacts certain trends in both current and long-term operating results. Please refer to *Management's Discussion and Analysis of Financial Condition and Results of Operations – Financial Overview of Tertiary Operations* in our Form 10-K for further information regarding these matters.

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

- (1) Includes full cost pool ceiling test write-downs of \$1.8 billion and \$3.6 billion for the three and nine months ended September 30, 2015, respectively, and an impairment of goodwill charge of \$1.3 billion for the three and nine months ended September 30, 2015.
- (2) Barrel of oil equivalent using the ratio of one barrel of oil to six Mcf of natural gas ("BOE").
- (3) See also *Commodity Derivative Contracts* below and *Item 3. Quantitative and Qualitative Disclosures about Market Risk* for information concerning our derivative transactions.
- (4) Noncash fair value adjustments on commodity derivatives is a non-GAAP measure and is different from "Commodity derivatives expense (income)" in the Unaudited Condensed Consolidated Statements of Operations in that the noncash fair value adjustments on commodity derivatives represents only the net change between periods of the fair market values of commodity derivative positions, and excludes the impact of settlements on commodity derivatives during the period, which were receipts on settlements of \$160.7 million and \$433.3 million for the three and nine months ended September 30, 2015, compared to payments on settlements of \$24.9 million and \$102.3 million for the three and nine months ended September 30, 2014. We believe that noncash fair value adjustments on commodity derivatives is a useful supplemental disclosure to "Commodity derivatives expense (income)" in order to differentiate noncash fair market value adjustments from settlements on commodity derivatives during the period. This supplemental disclosure is widely used within the industry and by securities analysts, banks and credit rating agencies in calculating EBITDA and in adjusting net income to present those measures on a comparative basis across companies, as well as to assess compliance with certain debt covenants. Noncash fair value adjustments on commodity derivatives is not a measure of financial or operating performance under GAAP, nor should it be considered in isolation or as a substitute for "Commodity derivatives expense (income)" in the Unaudited Condensed Consolidated Statements of Operations.
- (5) Lease operating expenses reported in this table include certain nonrecurring amounts, comprised of (1) lease operating expenses and related insurance recoveries recorded to remediate an area of Delhi Field (see *Capital Resources and Liquidity – Insurance Recoveries to Cover Costs of 2013 Delhi Field Release* above), (2) a reimbursement for a retroactive utility rate adjustment, and (3) other insurance recoveries. If these amounts were excluded, lease operating expenses would have totaled \$127.6 million and \$400.9 million for the three and nine months ended September 30, 2015, respectively, and \$165.1 million and \$498.7 million for the three and nine months ended September 30, 2014, respectively, and lease operating expense per BOE would have averaged \$19.43 and \$20.08 for the three and nine months ended September 30, 2015, respectively, and \$24.32 and \$24.59 for the three and nine months ended September 30, 2014, respectively.

Total production	73,718	75,320	73,810	74,875	74,356	73,716	71,410

(1) Other mature properties include Cranfield, Little Creek, Lockhart Crossing, Martinville, McComb and Soso fields.

(2) Beginning with the fourth quarter of 2014, average daily Delhi Field production amounts reflect the reversionary assignment of approximately 25% of our interest in that field effective November 1, 2014. The effectiveness, timing, and scope of the reversionary assignment are subject to ongoing litigation, the ultimate outcome of which cannot be predicted.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations

Total Production

Total production during the third quarter of 2015 averaged 71,410 BOE/d, a decrease of 2,400 BOE/d (3%) compared to third quarter of 2014 production levels and a decrease of 2,306 BOE/d (3%) compared to second quarter of 2015 production levels. The change between the comparative third quarters was primarily a result of natural production declines at our mature tertiary properties in the Gulf Coast region and Cedar Creek Anticline ("CCA") in the Rocky Mountain region, as well as a temporary production decline at Tinsley Field and a contractual reversionary interest assignment at Delhi Field, each of which is discussed in further detail below. The production declines mentioned above and in other fields include what we currently estimate to be approximately 1,100 BOE/d of production (excluding Riley Ridge) that is shut-in attributable to wells that have become uneconomic to either produce or repair due to commodity prices at this time. These negative impacts to production were partially offset by increases in production at our newer tertiary floods. On a year-to-date basis, total production decreased 1,133 BOE/d (2%) between the first nine months of 2014 and 2015 as a result of the factors discussed above. Our production during the three and nine months ended September 30, 2015 was 95% oil, consistent with oil production of 96% and 95% during the three and nine months ended September 30, 2014.

Tertiary Production

Oil production from our tertiary operations during the third quarter of 2015 decreased 793 Bbls/d (2%) compared to tertiary oil production levels in the same period in 2014, and decreased 1,750 Bbls/d (4%) when comparing tertiary oil production between the second and third quarters of 2015. The year-over-year decrease was largely due to Tinsley Field facility processing constraints and impacts of warmer temperatures restricting CO₂ injection and recycling, which caused us to temporarily shut-in certain wells at Tinsley Field. We expect production at Tinsley Field to return to higher levels in the fourth quarter of 2015; however, production has likely peaked and will be on a gradual decline going forward. The year-over-year decrease was further impacted by natural production declines at our mature properties in the Gulf Coast region, as well as our ownership interest at Delhi Field decreasing as of November 1, 2014, due to a contractual reversionary assignment of approximately 25% of our interest to the seller of the field, the effectiveness, timing, and scope of which are subject to ongoing litigation, and which reduced our third quarter 2015 production by approximately 1,200 Bbls/d. Partially offsetting the year-over-year decrease was an increase in production from continued field development and expansion of facilities in our tertiary floods at Oyster Bayou Field in our Gulf Coast region and Bell Creek Field in our Rocky Mountain region. The sequential-quarter decrease in production was primarily due to the Tinsley Field items noted above, partially offset by a production increase at Bell Creek Field.

Non-Tertiary Production

Production from our non-tertiary operations averaged 30,576 BOE/d during the third quarter of 2015, a decrease of 1,607 BOE/d (5%) compared to the third quarter of 2014 levels and a decrease of 556 BOE/d (2%) when compared to the second quarter of 2015 levels. These decreases are primarily comprised of natural production declines at CCA and our other non-tertiary Rocky Mountain properties, as well as shutting in certain wells that are uneconomic to either produce or repair at this time due to commodity prices. The year-over-year decrease was partially offset by increases in production at Conroe Field and production associated with our Manvel Field acquisition which was completed during the second quarter of 2015, both of which are included in our Texas non-tertiary properties. Natural gas production from Riley Ridge was negligible during both the third quarter of 2014 and 2015 due to continued downtime as a result of, among other things, design, equipment, machinery and mechanical well failures. We currently expect that natural gas production at Riley Ridge will continue to be shut-in for some time as we develop and evaluate solutions to eliminate sulfur build-up in those wells. Production from our other non-tertiary properties is generally on decline, and in some instances the decline is pronounced when non-tertiary wells are shut-in as part of an initiation or expansion of our tertiary floods in a field or an area of a field.

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Oil and Natural Gas Revenues

Our oil and natural gas revenues during the three and nine months ended September 30, 2015 decreased 53% and 50%, respectively, compared to these revenues for the same periods in 2014, and decreased 21% sequentially when compared to oil and natural gas revenues in the three months ended June 30, 2015. The changes in our oil and natural gas revenues during the comparative three and nine month periods are due to changes in production quantities and commodity prices (excluding any impact of our commodity derivative contracts), as reflected in the following table:

<i>In thousands</i>	Three Months Ended		Nine Months Ended	
	September 30, 2015 vs. 2014		September 30, 2015 vs. 2014	
	Decrease in Revenues	Percentage Decrease in Revenues	Decrease in Revenues	Percentage Decrease in Revenues
Change in oil and natural gas revenues due to:				
Decrease in production	\$ (20,219)	(3)%	\$ (29,020)	(2)%
Decrease in commodity prices	(311,398)	(50)%	(919,111)	(48)%
Total decrease in oil and natural gas revenues	<u>\$ (331,617)</u>	<u>(53)%</u>	<u>\$ (948,131)</u>	<u>(50)%</u>

Excluding any impact of our commodity derivative contracts, our net realized commodity prices and NYMEX differentials were as follows during the first quarters, second quarters, third quarters, and nine months ended September 30, 2015 and 2014:

	Three Months Ended		Three Months Ended		Three Months Ended		Nine Months Ended	
	March 31,		June 30,		September 30,		September 30,	
	2015	2014	2015	2014	2015	2014	2015	2014
Average net realized prices:								
Oil price per Bbl	\$ 46.02	\$ 97.69	\$ 56.92	\$ 100.04	\$ 45.74	\$ 94.78	\$ 49.58	\$ 97.49
Natural gas price per Mcf	2.54	4.71	2.44	4.39	2.40	3.55	2.46	4.26
Price per BOE	44.45	94.03	54.69	95.86	44.20	91.60	47.81	93.83
Average NYMEX differentials:								
Oil per Bbl	\$ (2.81)	\$ (0.91)	\$ (0.89)	\$ (3.03)	\$ (0.96)	\$ (2.53)	\$ (1.52)	\$ (2.16)
Natural gas per Mcf	(0.28)	(0.02)	(0.30)	(0.19)	(0.34)	(0.40)	(0.30)	(0.16)

As reflected in the table above, our average net realized oil price, excluding the impact of commodity derivative contracts, decreased 52% during the third quarter of 2015 from the average price received during the third quarter of 2014. Company-wide average oil price differentials in the third quarter of 2015 were \$0.96 per Bbl below NYMEX, compared to an average differential of \$2.53 per Bbl below NYMEX in the third quarter of 2014, principally due to improvement in our Rocky Mountain region price differentials. Prices received in a regional market fluctuate frequently and can differ from NYMEX pricing due to a variety of reasons, including supply and/or demand factors, crude oil quality, and location differentials. The oil differentials we received in the Gulf Coast and Rocky Mountain regions are discussed in further detail below.

Our average NYMEX oil differential in the Gulf Coast region was a positive \$0.92 per Bbl and \$2.15 per Bbl during the three months ended September 30, 2015 and 2014, respectively, and a positive \$1.86 per Bbl during the three months ended June 30, 2015. These differentials are impacted significantly by the changes in prices received for our crude oil sold under LLS index prices relative to the change in NYMEX prices, as well as various other price adjustments such as those noted above. The quarterly average LLS-to-NYMEX differential (on a trade-month basis) was a positive \$3.89 per Bbl in the third quarter of 2015, up from a positive \$3.41 per Bbl in the third quarter of 2014 and down from a positive \$6.29 per Bbl in the second quarter of 2015. During the third quarter of 2015, we sold approximately 44% of our crude oil at prices based on the LLS index price, approximately 15%

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

at prices partially tied to the LLS index price, and the balance at prices based on various other indexes tied to NYMEX prices, primarily in the Rocky Mountain region. The percentage of crude oil sold at prices partially tied to the LLS index price decreased from the third quarter of 2014 due to a contract expiration at the end of June 2015, while the percentage of crude oil sold at prices based on the LLS index was relatively consistent with that realized during the third quarter of 2014.

NYMEX oil differentials in the Rocky Mountain region averaged \$4.73 per Bbl and \$11.96 per Bbl below NYMEX during the three months ended September 30, 2015 and 2014, respectively, and \$6.48 per Bbl below NYMEX during the three months ended June 30, 2015. Differentials in the Rocky Mountain region can fluctuate significantly on a month-to-month basis due to weather, refinery or transportation issues, and Canadian and U.S. crude oil price index volatility.

Our natural gas NYMEX differentials are generally caused by movement in the NYMEX natural gas prices during the month, as most of our natural gas is sold on an index price that is set near the first of each month. While the percentage change in NYMEX natural gas differentials can be quite large, the absolute impact of these changes on our results has historically been minor, as natural gas sales represented only approximately 2% of our oil and natural gas revenues during the nine months ended September 30, 2015.

Commodity Derivative Contracts

The following tables summarize the impact our oil and natural gas derivative contracts had on our operating results for the three and nine months ended September 30, 2015 and 2014:

<i>In thousands</i>	Three Months Ended September 30,							
	2015		2014		2015		2014	
	Crude Oil Derivative Contracts		Natural Gas Derivative Contracts		Total Commodity Derivative Contracts			
Receipt (payment) on settlements of commodity derivatives	\$ 159,770	\$ (25,016)	\$ 907	\$ 102	\$ 160,677	\$ (24,914)		
Noncash fair value adjustments on commodity derivatives ⁽¹⁾	(68,054)	276,240	(595)	939	(68,649)	277,179		
Total income	\$ 91,716	\$ 251,224	\$ 312	\$ 1,041	\$ 92,028	\$ 252,265		

<i>In thousands</i>	Nine Months Ended September 30,							
	2015		2014		2015		2014	
	Crude Oil Derivative Contracts		Natural Gas Derivative Contracts		Total Commodity Derivative Contracts			
Receipt (payment) on settlements of commodity derivatives	\$ 430,669	\$ (101,470)	\$ 2,624	\$ (785)	\$ 433,293	\$ (102,255)		
Noncash fair value adjustments on commodity derivatives ⁽¹⁾	(305,198)	102,521	(1,917)	559	(307,115)	103,080		
Total income (expense)	\$ 125,471	\$ 1,051	\$ 707	\$ (226)	\$ 126,178	\$ 825		

(1) Noncash fair value adjustments on commodity derivatives is a non-GAAP measure. See *Operating Results Table* above for a discussion of the reconciliation between noncash fair value adjustments on commodity derivatives to "Commodity derivatives expense (income)" in the Unaudited Condensed Consolidated Statements of Operations.

For the fourth quarter of 2015, we have commodity derivative contracts consisting of a combination of enhanced swaps and three-way collars covering a total of 38,000 Bbls/d. Roughly half of these derivative contracts are three-way collars, so the variability in potential cash flows from these types of hedges exposes us to more downside price risk than our enhanced swaps. These 2015 three-way collars, which include both NYMEX and LLS hedges, have a weighted average floor of approximately \$86 per Bbl (\$85 per Bbl and \$88 per Bbl for NYMEX and LLS hedges, respectively) and a weighted average ceiling price of approximately \$100 per Bbl (\$99 per Bbl and \$101 per Bbl for NYMEX and LLS hedges, respectively). Our three-way collars

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

and enhanced swaps all include sold puts that have a weighted average price of \$68 per Bbl, limiting the benefit that our hedges provide us to the extent that oil prices remain below the price of these sold puts.

Changes in commodity prices and the expiration of contracts cause fluctuations in the estimated fair value of our oil and natural gas derivative contracts. Because we do not utilize hedge accounting for our commodity derivative contracts, the period-to-period changes in the fair value of these contracts, as outlined above, are recognized in our statements of operations. The details of our outstanding commodity derivative contracts at September 30, 2015, are included in Note 5, *Commodity Derivative Contracts*, to the Unaudited Condensed Consolidated Financial Statements. Also, see Item 3, *Quantitative and Qualitative Disclosures about Market Risk* below for additional discussion on our commodity derivative contracts.

Production Expenses

Lease Operating Expense

<i>In thousands, except per-BOE data</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Lease operating expense				
Tertiary	\$ 73,749	\$ 95,671	\$ 238,707	\$ 292,238
Non-tertiary	53,868	69,433	162,164	206,495
Total recurring lease operating expense	127,617	165,104	400,871	498,733
Tertiary – nonrecurring amounts	(13,715)	(9,906)	(13,715)	(9,906)
Total lease operating expense	<u>\$ 113,902</u>	<u>\$ 155,198</u>	<u>\$ 387,156</u>	<u>\$ 488,827</u>
Lease operating expense per BOE				
Tertiary	\$ 19.63	\$ 24.98	\$ 20.94	\$ 26.23
Non-tertiary	19.15	23.45	18.91	22.60
Total recurring lease operating expense per BOE	19.43	24.32	20.08	24.59
Tertiary – nonrecurring amounts	(3.65)	(2.58)	(1.20)	(0.89)
Total lease operating expense per BOE	17.34	22.86	19.39	24.10

Our lease operating costs have declined as a result of our cost reduction efforts throughout 2014 and 2015, as well as general market decreases in the prices of many of the components of these costs, and our total recurring normalized lease operating expenses in the third quarter of 2015 were less than \$19.50 per BOE. Our total lease operating expense in the third quarter of 2015 was \$17.34 per BOE, as during the third quarter we recognized insurance and other reimbursements totaling \$13.7 million, comprised of a reimbursement for a retroactive utility rate adjustment (\$9.6 million) and an insurance reimbursement for previous well control costs (\$4.1 million). During the third quarter of 2014, we recognized certain lease operating expenses and related insurance recoveries to remediate an area of Delhi Field, for a net reimbursement of \$9.9 million (see *Capital Resources and Liquidity – Insurance Recoveries to Cover Costs of 2013 Delhi Field Release* above). Our recurring lease operating expenses per BOE decreased in each of our last seven sequential quarters and decreased a total of 26% between the fourth quarter of 2013 and the third quarter of 2015. Total lease operating expenses, excluding nonrecurring amounts, decreased \$37.5 million (23%) and \$97.9 million (20%) on an absolute-dollar basis or \$4.89 (20%) and \$4.51 (18%) on a per-BOE basis during the three and nine months ended September 30, 2015, compared to levels in the same periods in 2014. The decrease during both periods was due to cost decreases in most categories of lease operating expenses, the most significant of which included (1) a decrease in workover costs, (2) lower power costs due to lower rates and usage, (3) lower CO₂ expense resulting from a decrease in CO₂ injection volumes and a decrease in the cost of CO₂, which correlates with oil prices, and (4) lower third-party contractor and vendor expenses such as contract labor and chemical costs. Sequentially, excluding insurance and other reimbursements, lease operating expenses declined 3% on an absolute-dollar basis and 1% on a per-BOE basis between the second and third quarters of 2015, as we have

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

seen many of our costs decline, with the decrease in CO₂ and workover expense the primary components of lease operating expense cost reductions.

Excluding nonrecurring amounts detailed above, tertiary lease operating expenses decreased \$21.9 million and \$53.5 million on an absolute-dollar basis and decreased \$5.35 and \$5.29 on a per-barrel basis during the three and nine months ended September 30, 2015, respectively, compared to the levels in the same periods in 2014. The decreases in both periods were primarily due to the same reasons detailed in the paragraph above. As part of our innovation and improvement initiative, we have identified fields where we have been able to reduce CO₂ injections without impacting oil production. As such, we have been able to reduce injected CO₂ volumes in the Gulf Coast region by 21% when compared to those in the prior year third quarter and by 11% on a sequential-quarter basis. In addition, our operating costs on a per-barrel basis at our newer tertiary floods such as Oyster Bayou and Bell Creek fields have improved from those in the third quarter of 2014 due to production increases. For any specific field, we expect our tertiary lease operating expense per barrel to be high initially, as we experienced in 2013 and 2014 with our Bell Creek flood, and then decrease as production increases, ultimately leveling off until production begins to decline in the later life of the field, when operating expenses per barrel will again increase. When comparing the third quarter of 2015 to the second quarter of 2015, tertiary lease operating expenses, excluding insurance and other reimbursements, decreased \$5.8 million (7%) or \$0.89 (4%) on a per-barrel basis.

Currently, our CO₂ expense comprises approximately 20% of our typical tertiary lease operating expenses, and for the CO₂ reserves we already own, consists of CO₂ production expenses, and for the CO₂ reserves we do not own, consists of our purchase of CO₂ from royalty and working interest owners and industrial sources. During the third quarters of 2015 and 2014, approximately 57% and 64%, respectively, of the CO₂ utilized in our CO₂ floods consisted of CO₂ owned and produced by us. The price we pay others for CO₂ varies by source and is generally indexed to oil prices. When combining the production cost of the CO₂ we own with what we pay third parties for CO₂, our average cost of CO₂ during the third quarter of 2015 was approximately \$0.31 per Mcf, including taxes paid on CO₂ production but excluding depletion and depreciation of capital. This rate during the third quarter of 2015 was lower than the \$0.40 per Mcf during the third quarter of 2014, primarily driven by reductions in the price of CO₂ due to the significant decline in oil prices, and was lower than the \$0.33 per Mcf comparable measure during the second quarter of 2015 due to commodity prices decreasing during the third quarter of 2015 and the impact of lower CO₂ utilization from Jackson Dome. Including the cost of depreciation and amortization of capital expended at our CO₂ source fields and industrial sources, but excluding depreciation of our CO₂ pipelines, our cost of CO₂ was \$0.42 per Mcf and \$0.51 per Mcf during the third quarters of 2015 and 2014, respectively.

Non-tertiary lease operating expenses decreased 22% on an absolute-dollar basis and 18% on a per-BOE basis between the three months ended September 30, 2015 and 2014. Non-tertiary lease operating expenses decreased 21% on an absolute-dollar basis and 16% on a per-BOE basis between the nine months ended September 30, 2015 and 2014. The decreases in both periods were primarily due to lower workover costs, repairs and maintenance costs, and lower third-party contractor and vendor expenses such as contract labor and chemical costs during the 2015 periods. On a sequential-quarter basis, our non-tertiary lease operating expenses increased \$1.2 million (2%) on an absolute-dollar basis and increased \$0.56 (3%) on a per-BOE basis during the third quarter of 2015.

Marketing and Plant Operating Expenses

Marketing and plant operating expenses primarily consist of amounts incurred relating to the marketing, processing, and transportation of oil and natural gas production, as well as expenses related to our Riley Ridge gas processing facility. Marketing and plant operating expenses decreased \$0.9 million (6%) and \$9.9 million (20%) during the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, primarily due to reductions in marketing, compression, and plant processing fees, as well as reductions related to the Riley Ridge gas processing facility, which is currently shut-in.

Taxes Other Than Income

Taxes other than income includes ad valorem, production and franchise taxes. Taxes other than income decreased \$14.4 million and \$50.9 million during the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014. The levels of taxes other than income during most periods are generally aligned with fluctuations in oil and natural gas revenues.

Denbury Resources Inc. Management's Discussion and Analysis of Financial Condition and Results of Operations

General and Administrative Expenses ("G&A")

<i>In thousands, except per-BOE data and employees</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Gross cash compensation and administrative costs	\$ 77,879	\$ 87,355	\$ 257,524	\$ 265,400
Gross stock-based compensation	9,621	10,986	29,364	33,343
Operator labor and overhead recovery charges	(39,075)	(42,763)	(122,630)	(128,836)
Capitalized exploration and development costs	(15,518)	(15,212)	(47,124)	(46,896)
Net G&A expense	<u>\$ 32,907</u>	<u>\$ 40,366</u>	<u>\$ 117,134</u>	<u>\$ 123,011</u>
G&A per BOE:				
Net administrative costs	\$ 3.93	\$ 4.72	\$ 4.84	\$ 4.88
Net stock-based compensation	1.08	1.22	1.03	1.19
Net G&A expense	<u>\$ 5.01</u>	<u>\$ 5.94</u>	<u>\$ 5.87</u>	<u>\$ 6.07</u>
Employees as of September 30	1,354	1,502		

Gross cash compensation and administrative costs on an absolute-dollar basis decreased \$9.5 million (11%) and \$7.9 million (3%) during the three and nine months ended September 30, 2015, respectively, compared to those costs in the same periods in 2014. As part of our efforts to reduce overhead and operating costs in response to the significant decline in oil prices, we reduced our employee headcount in mid-2015 through an involuntary workforce reduction, which contributed to an overall headcount reduction of approximately 11% between January 1, 2015 and September 30, 2015. The severance payments associated with the workforce reduction were not material to the quarterly financial results. The decrease in gross cash compensation and administrative costs during the three and nine months ended September 30, 2015, compared to the same periods in 2014, was primarily due to lower employee-related costs such as salaries, bonus accruals and long-term incentives resulting from reductions in employee headcount during 2015 and a reduction in costs associated with our stock purchase plan following its termination at the end of the first quarter of 2015, partially offset by severance payments associated with the workforce reduction and higher employee-related insurance costs.

Net G&A expense on a per-BOE basis decreased 16% and 3% during the three and nine months ended September 30, 2015, respectively, compared to levels in the same periods in 2014. The changes between the comparative three and nine month periods were primarily based on the changes noted in gross cash compensation and administrative costs and lower gross stock-based compensation associated with the reduction in headcount, partially offset by lower operator labor and overhead recovery charges.

Our well operating agreements allow us, when we are the operator, to charge a well with a specified overhead rate during the drilling phase and also to charge a monthly fixed overhead rate for each producing well. In addition, salaries associated with field personnel are initially recorded as gross cash compensation and administrative costs and subsequently reclassified to lease operating expenses or capitalized to field development costs to the extent those individuals are dedicated to oil and gas production, exploration, and development activities.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Interest and Financing Expenses

<i>In thousands, except per-BOE data and interest rates</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Cash interest expense	\$ 44,996	\$ 47,158	\$ 137,605	\$ 147,115
Noncash interest expense	2,310	3,456	6,810	10,434
Less: capitalized interest	(8,081)	(5,862)	(25,228)	(17,413)
Interest expense, net	\$ 39,225	\$ 44,752	\$ 119,187	\$ 140,136
Interest expense, net per BOE	\$ 5.97	\$ 6.59	\$ 5.97	\$ 6.91
Average debt outstanding	\$ 3,426,636	\$ 3,622,579	\$ 3,541,263	\$ 3,618,149
Average interest rate ⁽¹⁾	5.3%	5.2%	5.2%	5.4%

(1) Includes commitment fees but excludes debt issue costs and amortization of discount or premium.

As reflected in the table above, cash interest expense during the three and nine months ended September 30, 2015, decreased when compared to the same periods in 2014 as a result of the reduction in our average debt outstanding. The slight decrease in our average interest rate during the nine months ended September 30, 2015, compared to the same period in 2014, was due to our April 2014 long-term debt refinancing, whereby we issued \$1.25 billion of 5½% Senior Subordinated Notes due 2022 to replace our \$996.3 million of 8¼% Senior Subordinated Notes due 2020. Capitalized interest during the three and nine months ended September 30, 2015, increased \$2.2 million (38%) and \$7.8 million (45%), respectively, compared to the same periods in 2014, primarily due to incremental capitalized interest on projects that qualify for interest capitalization.

Depletion, Depreciation, and Amortization ("DD&A")

<i>In thousands, except per-BOE data</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Depletion and depreciation of oil and natural gas properties	\$ 90,390	\$ 114,224	\$ 322,440	\$ 337,841
Depletion and depreciation of CO ₂ properties	5,945	7,041	20,703	22,341
Amortization of asset retirement obligations	2,441	2,207	7,154	6,605
Depreciation of pipelines, plants and other property and equipment	22,630	23,088	69,007	69,067
Total DD&A	\$ 121,406	\$ 146,560	\$ 419,304	\$ 435,854
DD&A per BOE:				
Oil and natural gas properties	\$ 14.13	\$ 17.15	\$ 16.51	\$ 16.99
CO ₂ , pipelines, plants and other property and equipment	4.35	4.43	4.49	4.50
Total DD&A cost per BOE	\$ 18.48	\$ 21.58	\$ 21.00	\$ 21.49
Write-down of oil and natural gas properties	\$ 1,760,600	\$ —	\$ 3,612,600	\$ —

We adjust our DD&A rate each quarter for significant changes in our estimates of oil and natural gas reserves and costs. In addition, under full cost accounting rules, the divestiture of oil and gas properties generally does not result in gain or loss recognition; instead, the proceeds of the disposition reduce the full cost pool. As such, our DD&A rate has changed significantly over time,

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

and it may continue to change in the future. DD&A of oil and natural gas properties and asset retirement obligations on an absolute-dollar basis decreased 20% and 4% during the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014. On a per-BOE basis, DD&A of oil and natural gas properties and asset retirement obligations decreased 18% and 3% during the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014. These decreases were primarily due to a reduction in depletable costs associated with our reserves base resulting from the full cost pool ceiling test write-downs recognized during the first half of 2015. Given the additional full cost pool ceiling test write-down recognized during the three months ended September 30, 2015, we currently expect our DD&A rate in the fourth quarter of 2015 to further decrease from the third quarter of 2015 rate by approximately \$3 to \$4 per BOE. However, the overall decrease in our fourth quarter DD&A rate will also be impacted by potential changes in reserve volumes, production, and future capital expenditure estimates, among other factors, and therefore, the actual decrease will most likely differ from this estimate.

Depletion and depreciation of our CO₂ properties, pipelines, plants and other property and equipment decreased 5% on an absolute-dollar basis and 2% on a per-BOE basis during the three months ended September 30, 2015, compared to the same period in 2014, primarily due to a decrease in CO₂ production during the period, as we have been able to reduce the level of CO₂ production and injections with only a slight impact to our oil production.

Write-Down of Oil and Natural Gas Properties

Under full cost accounting rules, we are required each quarter to perform a ceiling test calculation. Under these rules, the full cost ceiling value is calculated using the average first-day-of-the-month oil and natural gas price for each month during a 12-month rolling period ended as of each quarterly reporting period. As a result of the precipitous and continuing decline in NYMEX oil prices since the fourth quarter of 2014, the rolling first-day-of-the-month average oil price for the preceding 12 months, after adjustments for market differentials by field, has fallen throughout 2015, from \$79.55 per Bbl for the first quarter of 2015, to \$68.48 per Bbl for the second quarter of 2015, and \$56.74 per Bbl for the third quarter of 2015. In addition, the first-day-of-the-month average natural gas price for the preceding 12 months, after adjustments for market differentials by field, was \$3.95 per Mcf for the first quarter of 2015, \$3.74 per Mcf for the second quarter of 2015, and \$3.64 per Mcf for the third quarter of 2015. The prices used for the third quarter of 2015 represent a decrease of 38% for crude oil and 15% for natural gas prices compared to adjusted prices used to calculate the December 31, 2014, full cost ceiling value. These falling prices have led to our recognizing full cost pool ceiling test write-downs of \$1.8 billion, \$1.7 billion and \$0.2 billion during the three months ended September 30, 2015, June 30, 2015, and March 31, 2015, respectively. We currently expect that we will record an additional write-down in the fourth quarter of 2015 in a range of similar magnitude to the write-down recorded in the third quarter of 2015 if oil and natural gas prices remain at or near late-October 2015 levels for the remainder of 2015, as the 12-month average prices used in determining the full cost ceiling value would reflect lower prices in the fourth quarter of 2015 than in the last quarter of 2014. Any such write-down would also be affected, in part, by changes in proved oil and natural gas reserve volumes, future capital expenditures and operating costs.

Impairment of Goodwill

We are required to test goodwill for impairment on an interim basis when we determine that it is more likely than not that the fair value of our reporting unit is less than its carrying amount. Our enterprise value (combined market capitalization plus a control premium of 10% and the fair value of our long-term debt) declined by approximately \$2.5 billion between June 30 and September 30, 2015; therefore, we concluded that a goodwill impairment test was required to be performed in the third quarter.

For the goodwill impairment test, we compared the fair value of the reporting unit (enterprise value) to the fair value of its assets and liabilities. Oil and natural gas reserves, which represent the most significant assets requiring valuation, were estimated using the expected present value of future net cash flows method based on September 30, 2015, NYMEX oil and natural gas futures prices for the next five years, which ranged from approximately \$47 per Bbl to \$58 per Bbl for oil and approximately \$3 per MMBtu for natural gas, adjusted for current price differentials. In addition to future oil and natural gas pricing, the most significant assumptions impacting the projections of future net cash flows include projections of future rates of production, timing and amount of future development and operating costs, projected availability and cost of CO₂, risk adjustment factors applied to probable and possible oil and natural gas reserve cash flows, projected recovery factors of oil and natural gas reserves, and a weighted average cost of capital discount rate of 9% per annum applied to all net cash flows. Because the fair value of the reporting unit (enterprise value) did not exceed the fair value of assets and liabilities, we recorded a goodwill impairment charge of \$1.3

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

billion during the three months ended September 30, 2015, to fully impair the carrying value of our goodwill. Approximately \$1.0 billion of the \$1.3 billion goodwill balance was associated with the March-2010 merger with Encore Acquisition Company. The fair value of our reporting unit (enterprise value) declining at a rate greater than the decline in NYMEX oil futures prices and resulting value of our oil and natural gas reserves between June 30 and September 30, 2015, was a primary cause of the impairment.

Please refer to *Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates – Impairment Assessment of Goodwill* in the Form 10-K for a complete discussion of the goodwill impairment test, including a discussion of relevant inputs.

Income Taxes

<i>In thousands, except per-BOE amounts and tax rates</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Current income tax expense	\$ 1,184	\$ 214	\$ 1,063	\$ 532
Deferred income tax expense (benefit)	(732,064)	167,356	(1,432,572)	168,967
Total income tax expense (benefit)	\$ (730,880)	\$ 167,570	\$ (1,431,509)	\$ 169,499
Average income tax expense (benefit) per BOE	\$ (111.25)	\$ 24.68	\$ (71.68)	\$ 8.36
Effective tax rate	24.6%	38.4%	29.0%	38.4%

We evaluate our estimated annual effective income tax rate based on current and forecasted business results and enacted tax laws on a quarterly basis and apply this tax rate to our ordinary income or loss to calculate our estimated tax liability or benefit. As of September 30, 2015, we had \$37.0 million of deferred tax assets associated with State of Louisiana net operating losses. As the result of a new tax law enacted in the State of Louisiana effective June 30, 2015, which limits a company's utilization of certain deductions, including our net operating loss carryforwards, we recognized a tax valuation allowance in the second quarter of 2015 of \$30.5 million to reduce the carrying value of our deferred tax assets. The valuation allowances will remain until the realization of future deferred tax benefits are more likely than not to become utilized.

Our income taxes are based on estimated statutory rates of approximately 38% in 2015 and 2014. Our effective tax rate for the three months ended September 30, 2015, was lower than our estimated statutory rate, as a significant portion of the book value of our goodwill impaired during the quarter had no related tax basis. Therefore, no corresponding deferred tax benefit was recognized related to that portion of the goodwill impairment. Our effective tax rate for the nine months ended September 30, 2015, was further impacted by the tax valuation allowance discussed above, which also reduced the net deferred tax benefit recognized. Our effective tax rate for the three and nine months ended September 30, 2014, was slightly above our estimated statutory rate, primarily due to a reduction in the domestic production activities deduction and the inclusion of differences between our 2013 tax provision and our 2013 filed tax returns. The amounts recorded as current income tax expense represent our federal taxes, reduced by enhanced oil recovery credits during the two periods, plus our state income taxes. The deferred income tax benefits during the three and nine months ended September 30, 2015, were primarily due to the impact of the write-down of our oil and natural gas properties during the year.

As of September 30, 2015, we had an estimated \$48.5 million of enhanced oil recovery credits to carry forward related to our tertiary operations and \$39.2 million of alternative minimum tax credits that can be utilized to reduce our current income taxes during 2015 or future years. These enhanced oil recovery credits do not begin to expire until 2023. We currently do not expect to earn additional enhanced oil recovery credits during 2015.

CRITICAL ACCOUNTING POLICIES

For additional discussion of our critical accounting policies, which remain unchanged, see *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Form 10-K.

FORWARD-LOOKING INFORMATION

The statements contained in this Quarterly Report on Form 10-Q that are not historical facts, including, but not limited to, statements found in the section *Management's Discussion and Analysis of Financial Condition and Results of Operations*, are forward-looking statements, as that term is defined in Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve a number of risks and uncertainties. Such forward-looking statements may be or may concern, among other things, forecasted production, cash flows and capital expenditures, drilling activity or methods including the timing and location thereof, pending or planned acquisitions or dispositions, development activities, timing of CO₂ injections and initial

Table of Contents

Denbury Resources Inc.

Management's Discussion and Analysis of Financial Condition and Results of Operations

production responses thereto, anticipated future cost savings, production rates and volumes or forecasts thereof, hydrocarbon reserve quantities and values, CO₂ reserves and their availability, helium reserves, potential reserves, percentages of recoverable original oil in place, hydrocarbon prices, pricing or cost assumptions based on current and projected future oil and gas prices, cost and availability of equipment and services, liquidity, availability of capital, borrowing capacity, regulatory matters, anticipated outcomes of pending litigation, prospective legislation affecting the oil and gas industry, mark-to-market values, possible future write-downs of oil and natural gas reserves, competition, long-term forecasts of production, finding costs, rates of return, estimated costs, estimates of the range of potential insurance recoveries, changes in costs, future capital expenditures and overall economics and other variables surrounding our operations and future plans. Such forward-looking statements generally are accompanied by words such as "plan," "estimate," "expect," "predict," "to our knowledge," "anticipate," "projected," "preliminary," "should," "assume," "believe," "may," or other words that convey, or are intended to convey, the uncertainty of future events or outcomes. Such forward-looking information is based upon management's current plans, expectations, estimates, and assumptions and is subject to a number of risks and uncertainties that could significantly and adversely affect current plans, anticipated actions, the timing of such actions and the Company's financial condition and results of operations. As a consequence, actual results may differ materially from expectations, estimates or assumptions expressed in or implied by any forward-looking statements made by or on behalf of the Company. Among the factors that could cause actual results to differ materially are fluctuations in worldwide oil prices or in U.S. oil prices and consequently in the prices received or demand for the Company's oil and natural gas; decisions as to production levels and/or pricing by OPEC in future periods; levels of future capital expenditures; effects of our indebtedness; success of our risk management techniques; inaccurate cost estimates; availability of and fluctuations in the prices of goods and services; the uncertainty of drilling results; operating hazards and remediation costs; disruption of operations and damages from well incidents, hurricanes, tropical storms, or forest fires; acquisition risks; requirements for capital or its availability; conditions in the worldwide financial and credit markets; general economic conditions; competition; government regulations, including tax and environmental; and unexpected delays, as well as the risks and uncertainties inherent in oil and gas drilling and production activities or that are otherwise discussed in this quarterly report, including, without limitation, the portions referenced above, and the uncertainties set forth from time to time in the Company's other public reports, filings and public statements including, without limitation, the Company's most recent Form 10-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk*Debt and Interest Rate Sensitivity*

We finance some of our acquisitions and other expenditures with fixed and variable rate debt. These debt agreements expose us to market risk related to changes in interest rates. As of September 30, 2015, we had \$210.0 million in outstanding borrowings on our bank credit facility. At this level of variable-rate debt, an increase or decrease of 10% in interest rates would have an immaterial effect on our interest expense. None of our existing debt has any triggers or covenants regarding our debt ratings with rating agencies, although under the NEJD financing lease, in the event of significant downgrades of our corporate credit rating by the rating agencies, certain credit enhancements can be required from us, and possibly other remedies made available under the lease.

The following table presents the principal balances of our debt, by maturity date, as of September 30, 2015:

<i>In thousands</i>	2017	2019	2021	2022	2023	Total
Variable rate debt:						
Bank Credit Facility (weighted average interest rate of 1.8% at September 30, 2015)	\$ —	\$ 210,000	\$ —	\$ —	\$ —	\$ 210,000
Fixed rate debt:						
6¾% Senior Subordinated Notes due 2021	—	—	400,000	—	—	400,000
5½% Senior Subordinated Notes due 2022	—	—	—	1,250,000	—	1,250,000
4⅝% Senior Subordinated Notes due 2023	—	—	—	—	1,200,000	1,200,000
Other Subordinated Notes	2,250	—	—	—	—	2,250

See Note 2, *Long-Term Debt*, to the Unaudited Condensed Consolidated Financial Statements for details regarding our long-term debt.

Oil and Natural Gas Derivative Contracts

Historically, we have entered into oil and natural gas derivative contracts to provide an economic hedge of our exposure to commodity price risk associated with anticipated future oil and natural gas production and to provide more certainty to our future cash flows. We do not hold or issue derivative financial instruments for trading purposes. Generally, these contracts have consisted of various combinations of price floors, collars, three-way collars, fixed-price swaps and fixed-price swaps enhanced with a sold put. The production that we hedge has varied from year to year depending on our levels of debt, financial strength, and expectation of future commodity prices. We have entered into a combination of enhanced swaps and three-way collars covering a total of 38,000 Bbls/d for the fourth quarter of 2015. Roughly half of these derivative contracts are three-way collars, so the variability in potential cash flows from these types of hedges exposes us to more downside price risk than our enhanced swaps. In addition, the sold puts that are part of our three-way collars and enhanced swaps limit the benefit our hedges provide us to the extent oil prices remain below the price of our sold puts. We anticipate that we may use more fixed-price swaps in the future or a combination of fixed-price swaps and collars as we look to provide more certainty around our cash flows in order to execute on our capital development plans and retain a healthy balance sheet. See Notes 5 and 6 to the Unaudited Condensed Consolidated Financial Statements for additional information regarding our commodity derivative contracts.

All of the mark-to-market valuations used for our oil and natural gas derivatives are provided by external sources. We manage and control market and counterparty credit risk through established internal control procedures that are reviewed on an ongoing basis. We attempt to minimize credit risk exposure to counterparties through formal credit policies, monitoring procedures and diversification. All of our commodity derivative contracts are with parties that are lenders under our bank credit facility (or affiliates of such lenders). We have included an estimate of nonperformance risk in the fair value measurement of our oil and natural gas derivative contracts, which we have measured for nonperformance risk based upon credit default swaps or credit spreads.

For accounting purposes, we do not apply hedge accounting treatment to our oil and natural gas derivative contracts. This means that any changes in the fair value of these derivative contracts will be charged to earnings on a quarterly basis instead of charging the effective portion to other comprehensive income and the ineffective portion to earnings.

At September 30, 2015, our commodity derivative contracts were recorded at their fair value, which was a net asset of \$199.4 million, a \$68.7 million decrease from the \$268.1 million net asset recorded at June 30, 2015, and a \$307.1 million decrease from the \$506.5 million net asset recorded at December 31, 2014. Changes in this value are comprised of the expiration of commodity derivative contracts during 2015, new commodity derivative contracts entered into during 2015 for future periods, and to the changes in oil and natural gas futures prices between December 31, 2014 and September 30, 2015.

Commodity Derivative Sensitivity Analysis

Based on NYMEX and LLS crude oil futures prices and natural gas futures prices as of September 30, 2015, and assuming both a 10% increase and decrease thereon, we would expect to receive payments on our crude oil and natural gas derivative contracts as shown in the following table:

<i>In thousands</i>	Receipt / (Payment)	
	Crude Oil Derivative Contracts	Natural Gas Derivative Contracts
Based on:		
Futures prices as of September 30, 2015	\$ 198,483	\$ 1,030
10% increase in prices	185,102	902
10% decrease in prices	211,864	1,159

Our commodity derivative contracts are used as an economic hedge of our exposure to commodity price risk associated with anticipated future production. As a result, changes in receipts or payments of our commodity derivative contracts due to changes in commodity prices as reflected in the above table would be mostly offset by a corresponding increase or decrease in the cash receipts on sales of our oil or natural gas production to which those commodity derivative contracts relate.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was performed under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2015, to ensure that information that is required to be disclosed in the reports the Company files and submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms; and that information that is required to be disclosed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Evaluation of Changes in Internal Control over Financial Reporting. Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we have determined that, during the third quarter of fiscal 2015, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are involved in various lawsuits, claims and regulatory proceedings incidental to our businesses. While we currently believe that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on our business or finances, litigation is subject to inherent uncertainties. Although a single or multiple adverse rulings or settlements could possibly have a material adverse effect on our business or finances, we only accrue for losses from litigation and claims if we determine that a loss is probable and the amount can be reasonably estimated.

In mid-2006, Denbury Onshore, LLC ("Denbury Onshore") purchased its original interest in the Delhi Field in northeastern Louisiana from NGS Sub Corp, ("NGS"), a subsidiary of Evolution Petroleum Corporation (together with its subsidiaries, "Evolution"). Under the purchase documents, Denbury Onshore committed to develop the enhanced production of a specific portion of Delhi Field, the Holt Bryant Unit, and after Denbury Onshore's receipt of a defined level of net cash flow from the Unit (as defined in the agreements, "payout"), to assign reversionary interests in the Unit back to NGS. After several years of dispute regarding payout calculations and related contractual terms, in December 2013, Evolution filed suit against Denbury Onshore in the 133rd Judicial District Court in Houston, Harris County, Texas for unspecified damages, alleging breach of contract, and requesting declaratory judgment as to various provisions of the purchase documents and accompanying oil and gas conveyancing instruments, including as to the method of calculation and timing of payout, the sharing of various costs, and the timing and extent of post-payout assignments from Denbury Onshore to NGS. In February 2014, we filed an answer and counterclaim denying Evolution's claims and alleging breach of contract by Evolution for failing to convey the full interest for which we paid and violating our preferential purchase rights, and asking for declaratory judgment as to purchase document terms, including those pertaining to the determination of payout, the assignment provisions of the documents, and cost sharing.

In March 2015, Evolution filed its First Amended Petition (subsequently further amended in June 2015), adding allegations of negligence and gross negligence against Denbury Onshore in connection with the June 2013 Delhi Field release of well fluids, the remediation of which was completed in the fourth quarter of 2013 (see Note 7, *Commitments and Contingencies*, to our Unaudited Condensed Consolidated Financial Statements). Evolution claims for the first time in the First Amended Petition, that it estimates its damages attributable to its allegations in the case exceed \$200 million. The First Amended Petition also adds a claim for unspecified punitive damages. There has only been limited discovery in the case to date, and Evolution has not specified the basis for the amount of its claimed damages estimate. The case is currently set for trial in April 2016. We believe that Evolution's claims with respect to this matter are without merit and intend to vigorously defend against them and pursue our rights under the purchase documents.

Item 1A. Risk Factors

Information with respect to the Company's risk factors has been incorporated by reference to Item 1A of the Form 10-K. There have been no material changes to the risk factors contained in the Form 10-K since its filing.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

The following table summarizes purchases of our common stock during the third quarter of 2015:

Month	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions) ⁽²⁾
July 2015	9,489	\$ 5.15	—	\$ 221.9
August 2015	2,229	3.72	—	221.9
September 2015	2,693,702	2.58	2,690,011	214.9
Total	<u>2,705,420</u>		<u>2,690,011</u>	

- (1) Stock repurchases during the third quarter of 2015 other than those under our common stock repurchase program were made in connection with delivery by our employees of shares to us to satisfy their tax withholding requirements related to the vesting of restricted shares and the exercise of stock appreciation rights.
- (2) In October 2011, the Company's Board of Directors approved a common share repurchase program for up to \$500 million of Denbury's common stock. During 2012 and 2013, the Board of Directors increased the dollar amount of Denbury common shares that could be purchased under the program to an aggregate of up to \$1.162 billion. On September 21, 2015, the Company's Board of Directors reinstated the ability to repurchase shares under our share repurchase program, which authorization was suspended in November of 2014. The program has no pre-established ending date and may be suspended or discontinued at any time. We are not obligated to repurchase any dollar amount or specific number of shares of our common stock under the program.

Between early October 2011, when we announced the commencement of a common share repurchase program, and November 4, 2015, we repurchased 64.4 million shares of Denbury common stock (approximately 16.0% of our outstanding shares of common stock at September 30, 2011) for \$951.8 million, with an additional \$210.1 million remaining authorized for purchases of common stock under this repurchase program.

**CONFIDENTIAL OFFICER RESIGNATION
AGREEMENT AND GENERAL RELEASE**

THIS CONFIDENTIAL OFFICER RESIGNATION AGREEMENT AND GENERAL RELEASE (this "**Agreement**") is entered into by and between Denbury Resources Inc., a Delaware corporation ("**DRI**," and together with its subsidiaries, collectively, the "**Company**"), and Bradford M. Kerr ("**Kerr**"), and is effective as of September 21, 2015 (the "**Effective Date**"), unless revoked by Kerr pursuant to, and in accordance with, Section 7(c).

W I T N E S S E T H:

WHEREAS, Kerr has been employed by DRI since June of 2014 and is currently serving as DRI's Senior Vice President - Development, Technical and Innovation;

WHEREAS, DRI and Kerr have reached certain agreements as to the terms and conditions of Kerr's resignation as an officer of the Company; and

WHEREAS, Kerr has been in a position of special responsibility and trust with the Company during his employment, with access to highly sensitive, valuable, confidential and proprietary information regarding, among other things, the Company's methods of operations, current and future business plans and strategies, personnel and finances, and other confidential and/or non-public information of the Company;

NOW, THEREFORE, in consideration of the premises and mutual covenants herein contained, and other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, DRI and Kerr agree as follows:

1. *Resignation as Officer.* Kerr and DRI agree that effective as of the Effective Date, Kerr shall resign as (a) Senior Vice President - Development, Technical and Innovation of DRI and (b) an officer of all other DRI subsidiaries, and Kerr shall not thereafter serve the Company in an officer's capacity or otherwise be an employee of the Company. In accordance with the terms of DRI's Bylaws, Kerr agrees to provide a letter of resignation to DRI's Secretary further evidencing his resignation as an officer as provided in this Section 1.

2. *Special Compensation Benefits and Consideration.* In exchange for, and in reliance on, the promises and covenants Kerr makes in this Agreement, and subject to the terms and conditions contained herein, including, without limitation, Section 16 hereof, the Company covenants and agrees to provide Kerr with the following special compensation, benefits and consideration (the "**Resignation Benefits**"):

(a) the total amount of \$750,000.00 in cash (the "**Severance Amount**"), such Severance Amount to be paid to Kerr in twenty-four (24) equal semi-monthly installments of \$31,250.00, commencing on the next regularly-scheduled Company payroll date following the Effective Date (provided, that, such date is subsequent to the expiration of the revocation period set forth in Section 7(c), and Kerr has not otherwise revoked this Agreement pursuant to, and in accordance with, such Section 7(c)), and continuing on a semi-monthly basis thereafter on each regularly scheduled Company payroll date until the full amount of the Severance Amount has been paid to Kerr; provided, that, on or immediately prior to the date on which any payment of the Severance Amount is to be made to Kerr or, if earlier, the date on which an amount is required to be included in the income of Kerr as a result of such payment, Kerr shall be required to pay to the Company, in cash, or the Company shall otherwise withhold from the payment of the Severance Amount to Kerr, the amount which the Company reasonably determines to be necessary in order for the Company to comply with applicable federal or state tax withholding and the collection of employment taxes.

(b) during the Continuation Period (as defined below), the applicable premium payment under COBRA, when due, for Kerr and his qualified beneficiaries for the cost of benefit continuation under the Company's major medical benefit plan, dental plan and vision insurance program, but excluding coverage under the Company's flexible spending account plan and other insurance or other benefits provided by the Company ("**COBRA Benefits**") in which Kerr has enrolled for the 2015 plan year, as such COBRA Benefits change as permitted by COBRA, beginning on October 1, 2015 and continuing and ending on March 31, 2017 (the "**Continuation Period**"); provided, that, the payment of such premium(s) shall be subject to the Company's

compliance with applicable federal or state tax withholding and the collection of employment taxes; provided, further, that, if Kerr does not properly elect COBRA coverage in accordance with the applicable benefit plans, Kerr will not receive the COBRA Benefits. For purposes of clarity, the COBRA Benefits provided pursuant to this Section 2(b) will run concurrently with any period of COBRA coverage Kerr may be entitled to receive under applicable law and the applicable benefit plans, determined without regard to this Section 2(b).

The Company's payment of the Resignation Benefits is subject to applicable federal, state, and local taxes and withholding, specifically including the withholding from any benefits payable under Sections 2(a) and 2(b). Without limitation of the foregoing, the Resignation Benefits provided under Section 2(b) shall also be reported as additional taxable compensation to Kerr, and Kerr shall be required to pay to the Company, in cash, or the Company shall otherwise withhold from the payment of such benefits to, or on behalf of, Kerr, the amount which the Company reasonably determines to be necessary in order for the Company to comply with applicable federal or state tax withholding and the collection of employment taxes.

(c) coaching and consulting services through Linkage, Inc. in a manner and frequency consistent with such services provided to Kerr during his employment with the Company; provided, however, that, any and all such services shall be for a continuous period of time commencing on the Effective Date (provided, further, that, Kerr has not otherwise revoked this Agreement pursuant to, and in accordance with, Section 7(c)), and shall be completed by, and no longer provided by the Company after, the date that is sixty (60) days following the Effective Date.

Notwithstanding anything to the contrary contained herein, no Resignation Benefits or any other amounts or benefits shall be due or otherwise payable, or commence or otherwise be provided, under this Agreement if this Agreement is revoked by Kerr pursuant to, and in accordance with, Section 7(c).

3. *Equity Awards; Cash Awards.* Those equity awards and cash awards, if any, to the extent held by Kerr immediately prior to the Effective Date shall be treated, governed and interpreted according to the terms of such awards, and, as applicable, of DRI's equity compensation plans under which they have been issued, including the vesting provisions thereof, and otherwise in a manner consistent with Kerr no longer being an officer or employee of the Company. Kerr acknowledges, agrees and understands that any and all unvested awards granted to him previously by the Company lapsed and became void as of the Effective Date.

4. *Non-Eligibility for Company Plans.* Kerr acknowledges, agrees and understands that after the Effective Date Kerr will not be eligible to receive awards under DRI's equity compensation plans made available to employees, nor will he be eligible to receive any severance benefits under the terms of any of DRI's severance protection plans.

5. *Kerr's Non-Competition and Other Covenants and Agreements.* In consideration of the special compensation, benefits and consideration received, or to be received, by Kerr, to which Kerr acknowledges he is not otherwise entitled, and the other agreements and consideration of DRI which are contained herein, Kerr agrees to the following covenants as reasonable and necessary for the protection of the Company's business interests:

(a) *Definitions:*

"Competing Business" means any person or entity that competes with or would compete with or displace, or that engages in any other activities so similar in nature or purpose to those of the Company set forth below so as to compete with, or displace or attempt to compete with or displace (i) in those geographic areas where the Company currently has activities as of the Effective Date or where it anticipates doing future business as part of the Company's business plans disclosed to or developed by or in consultation with Kerr prior to the Effective Date, any of the activities of the Company which involve or encompass the purchase, ownership or development of CO₂, in natural, anthropogenic or any other form, CO₂ pipelines, or the injection of CO₂ into previously producing oil fields for the purpose of tertiary recovery of remaining oil, or (ii) in the Gulf Coast and Rocky Mountain regions where the Company currently has activities as of the Effective Date, the purchase, ownership or development of oil fields with remaining oil potentially recoverable through CO₂ enhanced oil recovery operations.

“**Covered Persons**” means any person employed by the Company either as an employee, consultant or advisor as of the Effective Date, or hired by the Company prior to the Non-Competition Termination Date (as defined in Section 5(b) below).

(b) *No Unfair Competition; Non-Solicitation Agreement.* The parties agree that during the course of his employment, Kerr had access to, and the benefit of, the Company’s confidential information as more fully set forth in Section 5(g) herein. To protect the Company’s interest in its proprietary and confidential information, contacts and relationships, and as a material incentive for DRI to enter into this Agreement, as well as in exchange for the compensation specified herein, Kerr covenants and agrees that he will not, either directly or indirectly (whether personally or through another business, entity or person), for the period commencing on the Effective Date and ending on September 21, 2016 (the “**Non-Competition Termination Date**”):

- (i) work for, supervise, assist or participate in, a Competing Business in any capacity (as owner, employee, consultant, advisor, contractor, officer, director, lender, investor, agent, or otherwise) or otherwise engage in any Competing Business, or
- (ii) (1) recruit, solicit, or induce, (2) attempt to recruit, solicit or induce, or (3) encourage others to recruit, solicit or induce, any Covered Person to diminish, curtail, divert, or cancel its or their business relationship with, or employment by, the Company, specifically including providing, directly or indirectly, a reference to a recruiter, acquaintance or competitor that a Covered Person may be amenable to recruitment from a third party.

This Section 5(b) creates a narrowly tailored restraint of competition by Kerr in order to avoid unfair competition and irreparable harm to the Company and is not intended or to be construed as a general restraint from Kerr engaging in a lawful profession or a general covenant against competition in the oil and gas industry through the Non-Competition Termination Date. To this end, within the constraints of the preceding provisions of this Section 5(b), DRI agrees that this Section 5(b) will not prohibit Kerr’s work, engagement, or investment in the oil and gas industry (the “**Activities**”) so long as the Activities do not involve Kerr or entities, persons or groups for whom Kerr works, consults or invests (x) competing with or displacing the specified activities of the Company in those geographic areas or regions enumerated above in Section 5(a), or (y) using the Company’s data or non-public business plans disclosed or known to Kerr during his employment by the Company. Nothing in this Section 5 will prohibit the ownership of less than 10% of the publicly traded capital stock of an entity so long as this is not a controlling interest or mutual fund investment.

It is expressly understood and agreed that the Company and Kerr consider the restrictions contained in this Section 5(b) to be reasonable and necessary for the purposes of preserving and protecting the confidential information and other legitimate business interests of the Company; nevertheless, if any of the aforesaid restrictions are found by a court having jurisdiction to be unreasonable, over-broad as to geographic area or scope of activity, or otherwise unenforceable, the Company and Kerr intend for the restrictions herein set forth to be modified by such court so as to be reasonable and enforceable and, as so modified by the court, to be fully enforced.

(c) *No Personal Use of Company Oil and Gas Resources.* Kerr covenants and agrees that he will not utilize any Company oil and gas resources, including, but not limited to, maps, seismic information, feasibility studies, personnel, computers, software, books and records, or any other corporate assets, in connection with the Activities for his own account or the account of any entity, persons or groups for whom he works or consults or in which he invests.

(d) *Cooperation and Assistance.* In exchange for the compensation, covenants, and other good and valuable consideration provided by DRI herein, Kerr covenants and agrees that he will, until the Non-Competition Termination Date, (i) provide whatever cooperation and/or assistance is needed for any legal matters, proceedings or issues the Company may face, and (ii) cooperate with, and assist the Company and its employees in effecting, an orderly transition of all functions, duties and responsibilities of Kerr as an officer to one or more other employees of the Company, as the Company shall reasonably request. Additionally, Kerr agrees to provide such assistance in a professional manner, and in no event take any action that does, or could reasonably, create

a conflict of interest between him and the Company, or that could subject either him or the Company to civil or criminal liability or is contrary to the policies or procedures of the Company.

(e) *Non-disparagement.* Kerr covenants and agrees that he will refrain from engaging in any conduct, verbal or otherwise, that would disparage or harm the reputation of DRI or its former and present parents, subsidiaries, and/or affiliates, along with its predecessors, successors and/or assigns, if any, as well as their respective former and present directors, officers, managers, general or limited partners, representatives, agents, employees and/or attorneys, if any, jointly and severally (collectively, the “**DRI Released Parties**”), and Kerr further covenants and agrees that he will not say anything of a disparaging nature about the operations, management, or performance of the DRI Released Parties. Such restricted conduct shall include, but not be limited to, any negative statements made orally or in writing by Kerr about any of the DRI Released Parties. DRI, on behalf of its Board of Directors and management (collectively, “**DRI Management**”), covenants and agrees that they will refrain from engaging in any conduct, verbal or otherwise, that would disparage or harm the reputation of Kerr. Such restricted conduct shall include, but not be limited to, any negative statements made orally or in writing by DRI Management about Kerr.

(f) *Exceptions.* Nothing in this Agreement shall prohibit Kerr from (i) providing testimony in response to a valid subpoena, court order, regulatory request or other judicial, administrative or legal process or otherwise as required by law; provided, that, to the fullest extent permitted by law, Kerr agrees to notify the Company within three (3) days after receiving any request for testimony or information in response to a subpoena, court order, regulatory request or other judicial, administrative or legal process or otherwise as required by law, or (ii) reporting possible violations of federal law or regulation to any governmental agency or entity, including, but not limited to, the Department of Justice, the Securities and Exchange Commission, the Congress, and any agency Inspector General, or making other disclosures that are protected under the whistleblower provisions of federal law or regulation, and Kerr shall not be required to notify the Company that he has made any such reports or disclosures described in this clause (ii) except as otherwise provided by applicable law.

(g) *Confidential Information and Property.* Other than the Company-issued laptop, iPad and cell-phone which Kerr is currently using and entitled to retain (subject to the Company’s policies and procedures), Kerr covenants and agrees that he has returned, or within two (2) business days after the Effective Date will return, to the Company any and all Company property, equipment and other tangible items, including, without limitation, keys, building access cards and corporate credit cards, and any and all originals and/or copies of documents relating to the business of the Company or any of the other DRI Released Parties. Kerr further covenants and agrees (i) to not destroy, alter, erase, or otherwise change any software, data, or other information belonging to the DRI Released Parties, and (ii) that the Company may (A) withhold from the Resignation Benefits an amount equal to the value of Company property, equipment and tangible things Kerr fails to return, (B) withhold from the Resignation Benefits any monies Kerr owes the Company, including, but not limited to, charges to the Company corporate credit card for which Kerr did not submit a valid expense report, unused travel advances, salary draws, etc., and (C) withhold any and all Resignation Benefits which would otherwise be paid or made available to Kerr pursuant to this Agreement until such time as Kerr has fully complied with the terms of this Section 5(g). Kerr further covenants and agrees that he will not directly or indirectly disclose to anyone, or use for his own benefit or the benefit of anyone other than the Company, (x) this Agreement, its existence or terms (provided, that, the prohibition on disclosure provided in this clause (x) shall not apply to Kerr’s spouse (as applicable) or any professional advisors engaged by Kerr in connection with a review of this Agreement; provided, further, that, Kerr’s spouse (as applicable) and any such advisors are informed and agree to be bound by the prohibition on disclosure contained in this clause (x)), or (y) any confidential information that Kerr has received through his employment with the Company. “**Confidential information**” shall include any information that has been disclosed or made available to, or created by, Kerr, and which was at the time of disclosure, availability or creation confidential or proprietary to the Company, and involves or relates to the Company’s current and future business plans and strategies, methods of operations or operational techniques, financial, management and/or employee information, information regarding the Company’s practices and processes, or any other non-public information. Kerr further agrees that in the event it appears that he will be compelled by law or judicial process to disclose any such confidential information to avoid potential liability, he will notify the Company in writing immediately upon his receipt (and in no event less than twenty-four (24) hours after receipt) of a subpoena or other legal process. The obligations set forth in this Section 5(g) shall be in addition to any other confidentiality obligations that Kerr may have to the Company or any of the DRI Released Parties, and Kerr further acknowledges that the injury the DRI Released Parties will suffer in the event of Kerr’s breach

of any covenant or agreement set forth in this Section 5(g) cannot be compensated by monetary damages alone, and Kerr therefore agrees that the DRI Released Parties, in addition to and without limiting any other remedies or otherwise, shall have the right to obtain any injunctive or equitable relief against Kerr without notice and without posting a bond.

6. *General and Complete Release and Waiver by Parties.* For and in consideration of the payments and benefits provided to be made under the provisions of Section 2 above, as well as the covenants and other consideration of DRI contained herein, the receipt and sufficiency of which are hereby acknowledged by Kerr, Kerr, on behalf of himself and his family, assigns, representatives, agents, and/or heirs, if any (collectively with Kerr, the “**Kerr Parties**”), hereby covenants not to sue and fully, finally and forever generally releases, acquits and forever discharges the DRI Released Parties, and/or any one of them, from any and all claims, demands, actions or liabilities of whatever kind or character, whether known or unknown, which the Kerr Parties, or any one of them, has or might claim to have against the DRI Released Parties, and/or any one of them, for any and all injuries, damages (actual or punitive), losses or attorneys’ fees, if any, incurred by any Kerr Party arising out of or in connection with any occurrence which transpired prior to the Effective Date, including, without limitation:

(a) All claims and causes of action arising under contract, tort, statute, or other common law, including, without limitation, breach of contract, fraud, fraudulent inducement, estoppel, misrepresentation, express or implied duties of good faith and fair dealing, wrongful discharge, discrimination, retaliation, harassment, negligence, gross negligence, false imprisonment, assault and battery, conspiracy, intentional or negligent infliction of emotional distress, slander, libel, defamation, refusal to perform an illegal act and invasion of privacy.

(b) All claims and causes of action arising under any federal, state, or local law, regulation, or ordinance, including, without limitation, claims under the AGE DISCRIMINATION IN EMPLOYMENT ACT, as amended, the Civil Rights Act of 1964, as amended, the Civil Rights Act of 1866, the Americans With Disabilities Act, the Fair Labor Standards Act, the Family and Medical Leave Act, the Employee Retirement Income Security Act as amended (except for vested benefits to which he is entitled), the Texas Commission on Human Rights Act, the Texas Labor Code, the Texas Government Code, as well as any claims for compensation of any nature whatsoever, employee benefits, vacation pay (except as otherwise provided by Company policy), expense reimbursement, consulting, equity awards, severance pay, pension or profit sharing benefits, health or welfare benefits, bonus compensation, commissions, deferred compensation or other remuneration, or employment benefits or compensation, except as specifically set forth in Section 2, “Special Compensation Benefits and Consideration”.

(c) All claims and causes of action for past or future loss of pay or benefits, expenses, damages for pain and suffering, mental anguish or emotional distress damages, liquidated damages, punitive damages, compensatory damages, injunctive relief, attorneys’ fees, interest, court costs, physical or mental injury, damage to reputation, and any other injury, loss, damage or expense or any other legal or equitable remedy of any kind whatsoever.

(d) All claims and causes of action arising out of or in any way connected with, directly or indirectly, Kerr’s employment with the Company, or any incident thereof, including, without limitation, (i) his treatment by the Company, (ii) the terms and conditions of his employment, (iii) the manner or amounts in which Kerr was paid or compensated by the Company, (iv) the separation of Kerr’s employment, and (v) this Agreement, including any claim that Kerr has been fraudulently induced to enter into this Agreement.

(e) All claims and causes of action of any kind or character which could have been alleged in any lawsuit or administrative charge, claim or proceeding that could have been filed against the DRI Released Parties (or any one of them) by any Kerr Party on its own behalf or on behalf of any other person.

Nothing in this Agreement will prevent Kerr from filing a charge or complaint with the Equal Employment Opportunity Commission or any other federal or state administrative agency, or participating in any investigation conducted by any federal or state administrative agency; provided, however, that, Kerr agrees that any right to personal legal or equitable relief he may have in connection with any such charge, complaint or investigation is hereby waived, forfeited and barred, except as otherwise expressly provided by law.

Kerr acknowledges and agrees that the compensation referenced in Section 2 above does not constitute monies to which he would otherwise be entitled as a result of his prior or current employment with the Company, and that these monies constitute fair and adequate compensation for the promises and covenants of Kerr set forth in this Agreement. Kerr agrees and acknowledges that no further amounts are due to him for cash compensation of any nature whatsoever, including salary, severance pay, performance cash or bonuses, or for equity awards, employee benefits, deferred compensation, commissions, vacation pay (except as may otherwise be provided by Company policy), pension, profit sharing benefits, health or welfare benefits, expense reimbursement (except as may be agreed to with respect to Kerr's previous expenditure for tickets for future professional sporting events), consulting, outplacement services, attorneys' fees, pay in lieu of notice, or for any other amounts, except as specifically set forth in Section 2, "Special Compensation Benefits and Consideration".

DRI also agrees not to sue and fully, finally and forever generally releases, acquits and forever discharges Kerr from any and all claims, demands, actions or liabilities of whatever kind or character, known as of the Effective Date, which DRI might claim to have against Kerr for any and all injuries, damages (actual and punitive), losses, or attorneys' fees, if any, incurred by DRI arising out of or in connection with any occurrence which transpired prior to the Effective Date.

7. *Consultation with Attorney and Review Period.*

(a) Kerr is advised, and acknowledges that he has been advised, to consult with an attorney prior to executing this Agreement concerning the meaning, import, and legal significance of this Agreement. Kerr acknowledges that he has read this Agreement, as signified by his signature below, and is voluntarily executing the same after, if sought, advice of counsel for the purposes and consideration herein expressed.

(b) Kerr affirms, acknowledges and agrees that (i) he has read and understands the terms of this Agreement, (ii) he is over the age of eighteen (18) years and is otherwise competent to execute this Agreement, (iii) he was given this Agreement on September 21, 2015, and has been given and provided the opportunity to consider and accept this Agreement until 5:00 p.m. (CST) on October 12, 2015 (a period of not less than twenty-one (21) days following the date Kerr was provided this Agreement) by signing it and returning it to James S. Matthews, Senior Vice President and General Counsel of DRI, at the address provided in Section 9 below, after which time it would have expired and be void if not received, (iv) any changes to this Agreement from the one that was initially presented on September 21, 2015 as a result of negotiation between him and the Company, whether material or immaterial, did not restart or extend the running of the applicable 21-day period of time in which he had to sign this Agreement, (v) he is entering into this Agreement knowingly and voluntarily and without any undue influence or pressures, (vi) this Agreement includes a release of any claim that Kerr may have under the Age Discrimination in Employment Act, and (vii) this Agreement represents and constitutes a full and final resolution of any and all claims, if any, which the Kerr Parties (or any one of them) may have against the DRI Released Parties (or any one of them).

(c) Kerr acknowledges that he shall be entitled to revoke this Agreement at any time prior to the expiration of seven (7) days after the date of execution of this Agreement by Kerr by providing written notice of such revocation to James S. Matthews, Senior Vice President and General Counsel of DRI, at the address provided in Section 9 below.

8. *Governing Law.* This Agreement shall be governed by, and construed under, the laws of the State of Texas.

9. *Notice.* Any notice, payment, demand or communication required or permitted to be given by this Agreement shall be deemed to have been sufficiently given or served for all purposes if delivered personally to and signed for by the party or to any officer of the party to whom the same is directed, or if sent by registered or certified mail, return receipt requested, postage and charges prepaid, addressed to such party at the address set forth below or to such other address as shall have been furnished in writing by such party for whom the communication is intended. Any such notice shall be deemed to be given on the date so delivered.

Denbury Resources Inc.
5320 Legacy Drive
Plano, Texas 75024
Attention: James S. Matthews
SVP and General Counsel

Bradford M. Kerr
3701 Chimney Rock Drive
Flower Mound, Texas 75022

10. *Severability.* In the event that any one or more of the provisions contained in this Agreement is for any reason held to be unenforceable in any respect under the laws of any applicable State or of the United States of America, such unenforceability will not affect any other provision of this Agreement, but with respect only to the jurisdiction holding the provision to be unenforceable, this Agreement will then be construed as if such unenforceable provision or provisions had never been contained herein.

11. *Entire Agreement.* This Agreement constitutes the sole agreement between the parties and supersedes any and all other agreements, oral or written, relating to the subject matter covered by the Agreement, with the exception of (i) any indemnity agreement which may exist between DRI and Kerr, and which indemnity agreement shall remain in force subject to its terms and independent of this Agreement, and (ii) the terms of DRI's equity compensation plans and the award agreements made thereunder which are not otherwise specifically addressed in this Agreement.

12. *Waiver.* Any waiver or breach of any of the terms or conditions of this Agreement shall not operate as a waiver of any other breach of such terms or conditions, or any other terms or conditions, nor shall any failure to enforce any provision hereof operate as a waiver of such provision or any other provision hereof.

13. *Assignment.* This Agreement is personal to Kerr and the rights and interests of Kerr hereunder may not be sold, transferred, assigned or pledged.

14. *Successors.* This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective heirs, representatives, successors (including specifically any successor to DRI by merger, reorganization or otherwise).

15. *Disputes.*

(a) If any dispute arises under this Agreement arising out of, related to or in connection with, the payment of amounts provided hereunder to be paid by DRI to Kerr, the timing of such payments or their calculation, or questions regarding the breach of the terms hereof or any issue of arbitrability (a "**Dispute**"), and the Dispute cannot be settled through direct discussions by the parties within a reasonable amount of time, DRI and Kerr agree that such Disputes shall be referred to and finally resolved by confidential binding arbitration in accordance with the provisions of Exhibit A hereto. The award of the arbitrator will be the exclusive remedy of the parties for such Disputes.

(b) Notwithstanding Section 15(a), the parties acknowledge that money damages would not be a sufficient remedy for any breach of Section 5(b), (e), and/or (g) by Kerr. Therefore, the parties agree that the Company may resort to Texas state courts having equity jurisdiction in and for Collin County, Texas and the United States District Court for the Northern District of Texas, to enforce Sections 5(b), (e), and/or (g) of this Agreement by injunctive relief. Additionally, the parties agree that the Company may enforce Kerr's promises made in Sections 5(b), (e), and/or (g) without posting a bond and without giving notice to the maximum extent permitted by law. Furthermore, in the event of a breach and/or threatened breach by Kerr, the Company shall be entitled to terminate any payments then owing to Kerr under this Agreement. The foregoing remedies shall not be deemed the exclusive remedies for a breach and/or threatened breach of Section 5(b), (e), and/or (g) of this Agreement, but shall be in addition to all remedies available at law or in equity to the Company, including, without limitation, the recovery of damages from Kerr.

(c) Jurisdiction and venue of any action relating to this Agreement or Kerr's employment by the Company (subject to the provisions of Section 15(a) hereof) shall be in the federal or state courts sitting in, or having jurisdiction over, Plano, Collin County, Texas.

16. *Consequences of Breach.* Without limitation of the terms and provisions of this Agreement, including, without limitation, Section 6 hereof, Kerr (a) agrees that he will indemnify and hold each of the DRI Released Parties harmless from any loss, cost, damage, or expense (including attorneys' fees, except as prohibited by law) incurred by any of them arising out of Kerr's breach of any portion of this Agreement, (b) agrees and understands that the Company's obligation to make any payments or to

provide any benefits under this Agreement, and Kerr's entitlement to and retention of any Resignation Benefits that the Company has agreed to provide him herein, is expressly conditioned upon Kerr's ongoing fulfillment of his promises, covenants and obligations herein, and (c) agrees, to the extent permitted by law, to immediately return or repay the amounts he has received from the Company in connection with this Agreement in excess of \$500.00 upon a finding or ruling by a court of competent jurisdiction that Kerr breached a provision of this Agreement. In the event DRI concludes or, in good faith, suspects that Kerr has breached this Agreement, no additional payments will be provided under this Agreement unless and until the Company is so ordered to make such payment by a court of competent jurisdiction.

17. *No Admission.* The parties agree that this Agreement does not constitute an admission of any kind by the Company, any DRI Released Party or Kerr.

18. *Amendments.* Any modification of this Agreement or additional obligation assumed by any party in connection with this Agreement shall be binding only if evidenced in writing signed by both parties to this Agreement or an authorized representative of each party. Additionally, this Agreement cannot be changed or terminated orally, but may be changed only through written addendum or amendment executed by both parties.

19. *Remedies.* In addition to the other remedies provided herein or by applicable law, any breach by Kerr of any of the terms and/or conditions contained in this Agreement shall give the Company the right to discontinue the performance of any unperformed duties and obligations under this Agreement to the extent permitted by applicable law. In the event Kerr breaches any term or condition of this Agreement, any delay by DRI to enforce this Agreement (or any term or condition hereof) shall not be deemed a waiver, acceptance, or acquiescence. Without limitation of any other provision of this Agreement, including, without limitation, Section 12 hereof, no waiver shall bind DRI unless supported by consideration, executed in writing, and delivered to Kerr by an authorized officer of DRI.

20. *Counterparts; Signatures.* This Agreement may be executed in several counterparts, each of which shall be deemed an original and all of which shall constitute one Agreement; it being understood that the parties need not sign the same counterparts. The exchange of copies of this Agreement and of signature pages by facsimile transmission, by electronic mail in "portable document format" ("pdf") form, or by any other electronic means, or by combination of such means, shall constitute effective execution and delivery of this Agreement as to the parties and may be used in lieu of the original Agreement for all purposes. Signatures of the parties transmitted by any means shall be deemed to be their original signatures for all purposes.

21. *Representations and Warranties.* By executing this Agreement, Kerr acknowledges that he: (a) is not relying upon any statements, understandings, representations, expectations, or agreements other than those expressly set forth in this Agreement, (b) has made his own investigation of the facts and is relying solely upon his own knowledge and, if applicable, the advice of his own legal counsel, (c) knowingly waives any claim that he was induced to enter into this Agreement by any misrepresentation or nondisclosure and any right to rescind or avoid this Agreement based upon presently existing facts, known or unknown, (d) is entering into this Agreement freely and voluntarily, and (e) has carefully read and understands all of the provisions of this Agreement. The parties stipulate that the Company is relying upon these representations and warranties in entering into this Agreement. These representations and warranties shall survive the execution of this Agreement.

PLEASE READ THIS AGREEMENT CAREFULLY. IT CONTAINS A RELEASE OF ALL KNOWN AND UNKNOWN CLAIMS.

THE UNDERSIGNED ACKNOWLEDGE THAT THEY HAVE CAREFULLY READ THE FOREGOING AGREEMENT, THAT THEY UNDERSTAND ALL OF ITS TERMS, AND THAT THEY ARE ENTERING INTO IT VOLUNTARILY.

IN WITNESS WHEREOF, the parties hereto affixed their signatures hereunder as of the date set forth below their signature blocks, to be effective as of the Effective Date.

EXHIBIT A

DISPUTE RESOLUTION PROCEDURES

1. **Applicable Law/Arbitration.** Venue for the arbitration provided under Section 15(a) of the Agreement shall be in Plano, Collin County, Texas. The parties waive their right to file a lawsuit in a court of law to prosecute any Dispute.
2. **Negotiation.** When a Dispute has arisen and negotiations have reached an impasse, either party may give the other party written notice of the Dispute. In the event such notice is given, the parties shall attempt to resolve the Dispute promptly by negotiation. Within ten (10) days after delivery of the notice, the receiving party shall submit to the other a written response. Thereafter, the parties shall promptly attempt to resolve the Dispute.
3. **Confidentiality of Settlement Negotiations.** All negotiations and proceedings pursuant to Section 2 above are confidential and shall be treated as compromise and settlement negotiations for purposes of applicable rules of evidence and any additional confidentiality protections provided by applicable law.
4. **Commencement of Arbitration.** If the Dispute has not been resolved by negotiation within fifteen (15) days of the disputing party's notice, or if the parties have failed to confer within fifteen (15) days after delivery of the notice, either party may then initiate arbitration by providing written notice of arbitration to the other party. In order to be valid, the notice shall contain a precise and complete statement of the Dispute. Within fifteen (15) days of receipt of the notice initiating arbitration, the receiving party shall respond by providing a written response which shall include its precise and complete response to the Dispute, and which includes any counter Dispute that the responding party may have.
5. **Selection of Arbitrator.** The arbitration shall be conducted and decided by a single neutral arbitrator that is mutually agreeable to the parties and knowledgeable and experienced in the type of matter that is the subject of the Dispute using the CPR (defined below) rules. Once selected, the arbitrator shall not have any ex parte communications with either party.
6. **Arbitration Process.** The arbitration hearing shall commence within a reasonable time after the selection of the arbitrator, as set by the arbitrator. The arbitrator shall allow the parties to engage in pre-hearing discovery, to include exchanging (i) requests for and production of relevant documents, (ii) up to fifteen (15) interrogatories, (iii) up to fifteen (15) requests for admissions, and producing for deposition and at the arbitration hearing, up to four (4) persons within each parties' control. Any additional discovery shall only occur by agreement of the parties or as ordered by the arbitrator upon a finding of good cause. The arbitration shall be conducted under the rules of the CPR International Institute for Conflict Prevention & Resolution ("**CPR**") in effect on the date of notice of the Dispute for dispute resolution rules for non-administered arbitration of business disputes. The parties may agree on such other rules to govern the arbitration that are not set out in this provision as they may mutually deem necessary.
7. **Arbitration Decision.** The arbitrator shall have the power to award interim relief, and to grant specific performance. The arbitrator may award interest at the "prime rate" as listed under "Market Data" in the *Wall Street Journal* on the date of any such award. Except as may be specifically limited elsewhere in this Exhibit A, the arbitrator's decision may be based on such factors and evidence as the arbitrator deems fit.
8. **Binding Arbitration Award.** The award of the arbitrator shall be final, conclusive and binding. The award rendered by the arbitrator may be entered in any court having jurisdiction in respect thereof, including any court in which an injunction may have been sought.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Phil Rykhoek, certify that:

1. I have reviewed this report on Form 10-Q of Denbury Resources Inc. (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of Chief Executive Officer and Chief Financial Officer
Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the accompanying Annual Report on Form 10-Q for the quarter ended September 30, 2015 (the Report) of Denbury Resources Inc. (Denbury) as filed with the Securities and Exchange Commission, each of the undersigned, in his capacity as an officer of Denbury, hereby certifies pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to his knowledge:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. The Information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Denbury.
