- Total demand deposit balances were 42\% of total deposits at December 31, 2017 and September 30, 2017, compared to $40 \%$ at December 31, 2016.

## Net Interest Income

Net interest income was $\$ 29.1$ million for the fourth quarter of 2017 , essentially flat compared to the linked quarter, and up $9 \%$ from the fourth quarter of 2016 . Net interest margin was $3.63 \%$ for the fourth quarter of 2017 , compared to $3.67 \%$ for the third quarter of 2017 , and $3.54 \%$ for the fourth quarter of 2016 . Net interest income increased $8 \%$ to $\$ 113.4$ million for the year, while net interest margin grew from $3.54 \%$ to $3.62 \%$. The increases in net interest income compared to the prior year quarterly period and the full year were largely attributable to loan growth and increasing interest rates. The linked quarter benefited from proceeds of $\$ 611,000$ received on an investment security that had been previously written down due to an other-than-temporary impairment, which added 8 basis points to the net interest margin for the third quarter of 2017. For the full year of 2017, proceeds received on investment securities that had previously been written down totaled $\$ 814,000$, adding 3 basis points to net interest margin.

The accretion income, net of amortization expense, from acquisitions was $\$ 715,000$ for the fourth quarter of 2017, compared to $\$ 816,000$ for the third quarter of 2017 and $\$ 874,000$ for the fourth quarter of 2016, which added 8 basis points, 10 basis points and 11 basis points, respectively, to net interest margin. For the full year of 2017, accretion income, net of amortization expense, from acquisitions was $\$ 3.1$ million, compared to $\$ 3.5$ million in 2016, and added 10 basis points and 11 basis points, respectively, to net interest margin.

## Provision for Loan Losses:

The provision for loan losses was $\$ 1.1$ million for both the fourth quarter and the third quarter of 2017, compared to $\$ 0.7$ million for the fourth quarter of 2016. Loan growth was the primary contributor to the increase in the provision for loan losses, and was offset by improvements in asset quality metrics compared to the third quarter of 2017. For the full year of 2017, provision for loan losses was $\$ 3.8$ million, compared to $\$ 3.5$ million for 2016 , and was driven by loan growth.

## Total Fee-Based Income:

Total fee-based income for the fourth quarter of 2017 increased $\$ 0.5$ million, or $4 \%$, compared to the linked quarter, and $\$ 1.0$ million, or $8 \%$, compared to the fourth quarter of 2016 . The increase compared to the third quarter of 2017 was primarily attributable to increases in trust and investment income, commercial loan swap fee income, and electronic banking income. The increase compared to the fourth quarter of 2016 was largely due to higher insurance income, trust and investment income, electronic banking income, and commercial loan swap fee income. Trust and investment income benefited from increased fiduciary and brokerage income during the quarter due largely to growth in assets under administration and management, as well as annual fees received for the administration of employee benefit plans. Commercial loan swap fee income is dependent upon customer demand, and was up $\$ 161,000$ in the fourth quarter of 2017 compared to the linked quarter, and $\$ 158,000$ compared to the fourth quarter of 2016. Insurance income was up compared to the fourth quarter of 2016 primarily due to increased property and casualty insurance commission income.

For the full year of 2017 , total fee-based income increased $\$ 1.6$ million, or $3 \%$, compared to 2016 . The increase was primarily attributable to increases in trust and investment income, mortgage banking income, and bank owned life insurance income, partially offset by a decrease in deposit account service charges. The increase in trust and investment income was due largely to growth in assets under administration and management. Mortgage banking income increased due to customer demand. The increase in bank owned life insurance income was the result of the additional $\$ 35$ million of bank owned life insurance policies that were purchased late in the second quarter of 2016, for which a full year of income was recognized in 2017.

## Total Non-interest Expense:

Total non-interest expense for the fourth quarter of 2017 was $\$ 27.4$ million, compared to $\$ 26.6$ million for the third quarter of 2017 , and $\$ 27.3$ million for the fourth quarter of 2016 . The increase compared to the linked quarter was due primarily to non-core charges and an increase in professional fees. Compared to the fourth quarter of 2016, total noninterest expense was relatively flat in the fourth quarter of 2017, as increases in Federal Deposit Insurance Corporation ("FDIC") insurance expense and marketing expense were offset by decreases in communications expense, professional fees, and data processing and software expense.

Total non-interest expense, adjusted for non-core charges, was up $\$ 265,000$ compared to the linked quarter and $\$ 287,000$ compared to the fourth quarter of 2016. In the fourth quarter of 2017 , Peoples recognized $\$ 341,000$ of acquisition-related costs and a $\$ 242,000$ pension settlement charge. In the fourth quarter of 2016, Peoples incurred $\$ 746,000$ of non-core charges related to the upgrade of Peoples' core banking systems.

For the full year of 2017, total non-interest expense was up $\$ 1.0$ million, or $1 \%$, compared to 2016 , primarily due to higher salaries and employee benefits costs, and data processing and software costs. The increase in salaries and employee benefits costs was largely due to higher incentive compensation, which was tied to corporate performance for 2017, coupled with increased medical insurance costs and pension settlement charges recognized. These increases were partially offset by declines in professional fees, communications expense, and amortization of other intangible assets.

Total non-interest expense, adjusted for non-core charges, was up $\$ 1.7$ million for the full year of 2017 compared to the full year of 2016 as charges related to the upgrade of Peoples' core banking system of $\$ 1.3$ million in 2016 exceeded aggregate non-core charges of $\$ 583,000$ in 2017, all of which were recognized during the fourth quarter of 2017.

The efficiency ratio for the fourth quarter of 2017 was $62.1 \%$, compared to $60.7 \%$ for the linked quarter and $66.9 \%$ for the fourth quarter of 2016. The increase in the efficiency ratio compared to the linked quarter was largely the result of noncore charges. The efficiency ratio, when adjusted for non-core items, was $60.7 \%$ for both the fourth quarter and third quarter of 2017 , and was $64.8 \%$ for the fourth quarter of 2016.

For the full year of 2017, the efficiency ratio was $62.2 \%$ compared to $65.1 \%$ in 2016 . The decrease in the efficiency ratio in 2017 compared to 2016 was the result of increases in both net interest income and fee-based income, as well as continued control over expenses. When adjusted for non-core items, the efficiency ratio for the full year of 2017 was $61.9 \%$, compared to $64.3 \%$ in 2016.

## Loans:

Period-end total loan balances at December 31, 2017 increased $\$ 30.1$ million, or $5 \%$ annualized, compared to September 30, 2017. Commercial lending was a key component of loan growth, as commercial loan balances increased $\$ 37.5$ million, or $11 \%$ annualized, during the quarter, with commercial and industrial loans growing $\$ 28.6$ million, or $26 \%$ annualized. Indirect consumer lending also contributed to the increase, as indirect consumer loan balances grew $\$ 4.9$ million, or $6 \%$ annualized, during the quarter, which partially offset decreases in other consumer lending categories. During the fourth quarter of 2017, growth in loan balances was partially offset by payoffs of certain criticized loans.

Compared to December 31, 2016, period-end loan balances at December 31, 2017 increased $\$ 132.2$ million, or 6\%. The increase was primarily the result of commercial loan growth of $\$ 95.5$ million, or $8 \%$, which was almost evenly split between commercial real estate and commercial and industrial loan balances. From a bank regulatory perspective, non-owner-occupied commercial real estate loan balances as of December 31, 2017 remained well below the financial institutions regulators' guidance of $300 \%$ of total risk-based capital. The ratio at December 31, 2017 of non-owneroccupied commercial real estate loans to total risk-based capital was $159 \%$, compared to $161 \%$ at September 30, 2017, and $155 \%$ at December 31, 2016. Indirect consumer lending also contributed loan growth of $\$ 87.9$ million, or $35 \%$, compared to December 31, 2016, and was partially offset by reductions in residential real estate loans. At December 31, 2017 and September 30, 2017, indirect consumer loan balances comprised $14 \%$ of the total loan portfolio, compared to $11 \%$ at December 31, 2016.

Quarterly average gross loan balances increased $\$ 22.7$ million, or $4 \%$ annualized, compared to the linked quarter. Commercial loans provided $\$ 18.3$ million of growth compared to the third quarter of 2017, while consumer indirect loans grew $\$ 16.5$ million, partially offset by an $\$ 11.6$ million decline in residential real estate loans. Quarterly average gross loan balances for the three months ended December 31, 2017 increased 7\% compared to the same period in 2016, with commercial loan growth of $\$ 114.6$ million, and consumer indirect loan growth of $\$ 97.3$ million. For the full year of 2017, average gross loan balances increased $8 \%$ compared to the full year of 2016, with the growth being almost evenly divided between commercial loans and consumer indirect loans.

## Asset Quality:

Asset quality metrics improved during the fourth quarter of 2017. Nonperforming assets as a percent of total loans and OREO was $0.74 \%$ at December 31, 2017, compared to $0.86 \%$ at September 30, 2017 and $1.16 \%$ at December 31, 2016. At December 31, 2017, nonperforming assets had declined 13\% from September 30, 2017, and 32\% from December 31, 2016.

Annualized net charge-offs were $0.22 \%$ of average gross loans during the fourth quarter of 2017 , compared to $0.16 \%$ in the linked quarter and $0.09 \%$ in the fourth quarter of 2016. The higher net charge-off rate during the fourth quarter of 2017 was primarily related to the partial charge-off of a single commercial real estate loan relationship. For the full year of 2017, net charge-offs were $0.15 \%$ of average gross loans, compared to $0.09 \%$ for the full year of 2016 .

Criticized loans, which are those categorized as special mention, substandard or doubtful, decreased $\$ 6.3$ million, or $7 \%$, compared to September 30, 2017, and $\$ 8.8$ million, or $9 \%$, compared to December 31, 2016. Classified loans, which are those categorized as substandard or doubtful, increased $\$ 5.1$ million, or $12 \%$, compared to September 30, 2017 and declined $\$ 11.4$ million, or $20 \%$, compared to December 31, 2016. The increase in classified loans compared to the end of the linked quarter was mostly due to one large commercial loan relationship that was downgraded during the fourth quarter. As a percent of total loans, classified loans were $1.97 \%$ at December 31, 2017, compared to $1.77 \%$ at September 30, 2017, and $2.59 \%$ at December 31, 2016. Criticized loans were $3.83 \%$ of total loans at December 31, 2017, compared to $4.15 \%$ at September 30, 2017 and $4.46 \%$ at December 31, 2016.

At December 31, 2017, the allowance for loan losses was $\$ 18.8$ million, compared to $\$ 19.0$ million at September 30, 2017, and $\$ 18.4$ million at December 31, 2016. The ratio of the allowance for loan losses as a percent of total loans was $0.80 \%$ at December 31, 2017, compared to $0.82 \%$ at September 30, 2017, and $0.83 \%$ at December 31, 2016. The ratio includes total acquired loans of $\$ 414.8$ million and allowance for acquired loan losses of $\$ 0.1$ million at December 31, 2017. The reductions in the ratio were due largely to continued improvement in asset quality metrics.

## Deposits:

In the third quarter of 2017, Peoples announced a new consumer checking account product suite to its customers. The migration of customer accounts began late in the third quarter of 2017 and was completed early in the fourth quarter, creating a shift of accounts from non-interest-bearing to interest-bearing demand deposit accounts.

As of December 31, 2017, period-end deposits increased $\$ 65.6$ million, or $10 \%$ annualized, compared to September 30 , 2017, and increased $\$ 220.6$ million, or $9 \%$, compared to December 31, 2016. The increase compared to September 30, 2017 was primarily attributable to a $\$ 66.6$ million increase in brokered certificates of deposit, and a $\$ 40.3$ million increase in demand deposit accounts, partially offset by a $\$ 25.4$ million decrease in governmental deposit accounts and a $\$ 17.5$ million decrease in money market deposit accounts. The increase compared to December 31, 2016 was largely due to a $\$ 119.5$ million increase in brokered certificates of deposit, and a $\$ 136.0$ million increase in demand deposit accounts.

Average deposits for the fourth quarter of 2017 increased $\$ 44.2$ million, or $2 \%$, compared to the linked quarter, which was largely attributable to increases of $\$ 58.8$ million in demand deposit accounts and $\$ 31.6$ million in brokered certificates of deposit, offset by reductions of $\$ 28.2$ million in governmental deposit accounts and $\$ 11.5$ million in money market deposit accounts. Compared to the fourth quarter of 2016, average deposits increased $\$ 168.7$ million, or $7 \%$, largely due to increases of $\$ 116.6$ million in demand deposit accounts and $\$ 100.2$ million in brokered certificates of deposit, offset by reductions of $\$ 33.2$ million in retail certificates of deposit and $\$ 29.3$ million in money market deposit accounts.

For the full year of 2017 , average deposits increased $\$ 101.0$ million, or $4 \%$, compared to the full year of 2016. The increase was largely attributable to increases of $\$ 106.9$ million in interest-bearing demand deposits and $\$ 57.2$ million in brokered certificates of deposit, offset by decreases of $\$ 48.0$ million in retail certificates of deposit and $\$ 11.8$ million in money market deposit accounts.

Total demand deposit accounts comprised 42\% of total deposits at both December 31, 2017 and September 30, 2017, compared to $40 \%$ at December 31, 2016.

## Stockholders' Equity:

At December 31, 2017, the tier 1 risk-based capital ratio was $13.70 \%$, compared to $13.60 \%$ at September 30, 2017 and $13.21 \%$ at December 31, 2016. The common equity tier 1 risk-based capital ratio was $13.41 \%$ at December 31, 2017, compared to $13.31 \%$ at September 30, 2017 and $12.91 \%$ at December 31, 2016. The total risk-based capital ratio was $14.58 \%$ at December 31, 2017, compared to $14.49 \%$ at September 30, 2017 and $14.11 \%$ at December 31, 2016. The improvement in these capital ratios compared to the end of the linked quarter was due primarily to increased earnings, which was largely driven by loan growth.

Peoples' capital position remained strong at December 31, 2017. The book value per share was $\$ 25.08$ at December 31, 2017, compared to $\$ 25.02$ at September 30, 2017 and $\$ 23.92$ at December 31, 2016. The tangible book value per share was $\$ 17.17$ at December 31, 2017, compared to $\$ 17.15$ at September 30, 2017 and $\$ 15.89$ at December 31, 2016. The tangible equity to tangible assets ratio was $9.14 \%$ at December 31, 2017, compared to $9.20 \%$ at September 30, 2017 and 8.80\% at December 31, 2016.

- Core non-interest expenses are non-GAAP since they exclude the impact of items such as costs associated with the system upgrade of Peoples core banking system, acquisition-related costs and pension settlement charges.
- Efficiency ratio is calculated as total non-interest expense (less amortization of other intangible assets) as a percentage of fully tax-equivalent net interest income plus total fee-based income. This measure is non-GAAP since it excludes amortization of other intangible assets and all gains and/or losses included in earnings (which are excluded from total fee-based income), and uses fully tax-equivalent net interest income.

- Pre-provision net revenue is defined as net interest income plus total fee-based income minus total non-interest expense. This measure is non-GAAP since it excludes provision for loan losses and all gains and/or losses included in earnings, which are excluded from total fee-based income.
- Return on tangible stockholders' equity is calculated as net income (less after-tax impact of amortization of other intangible assets) divided by tangible stockholders' equity. This measure is non-GAAP since it excludes the after-tax impact of amortization of other intangible assets from earnings and the balance sheet impact of goodwill and other intangible assets acquired through acquisitions on total stockholders' equity.
